FROM YOUR PRESIDENT

george d. hatie

In April I enjoyed attending the very successful conventions of the Central States Numismatic Society in Indianapolis and the Michigan State Numismatic Society in Dearborn, Michigan. During the Central States banquet, I was most pleased to receive from the Indianapolis Coin Club a check in the amount of \$1,000 for the ANA building fund. I am very grateful for this most generous contribution.

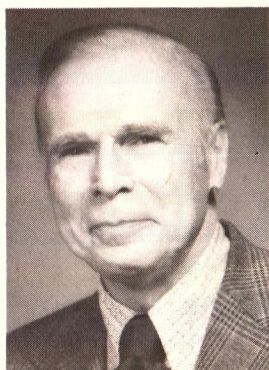

There appears to be no solution to the problem of the ever-increasing cost of attending conventions. Savings may be effectuated by selecting lower-priced hotels and motels in the vicinity of the convention area, using limousines and buses rather than cabs, and ordering air tickets well in advance at excursion rates. In order to obtain excursion rates, it may be necessary to select less desirable departure times to and from the convention city. Although it is important to order air tickets early to avoid price increases, airlines sometimes relax their requirements so that excursion rates not available at a particular time may become available at a later date. If you have purchased air fare tickets at a time when excursion rates were not available, you should check later to ascertain whether the situation has changed.

In the March issue I suggested that collectors should join with dealers in opposing any legislation which places burdensome and unreasonable obligations upon coin dealers in their purchases of coins and other numismatic material. By way of clarification, the first step should be (1) to express appreciation to the proponent of such legislation for his or her desire to apprehend thieves and fences, and (2) to suggest amendments that would eliminate the unreasonable interference with legitimate numismatic purchases in coin stores and at numismatic conventions. In order to have coins, tokens and medals excluded from such legislation, it may be desirable, by way of compromise, to make no objection to the inclusion of gold and silver watches, jewelry, dinnerware and other non-numismatic items.

During the Indianapolis Central States Convention, I attended a meeting of a proposed dealer organization, which will have as one of its prime purposes the protection of dealers from such burdensome legislation. I have also conferred with legislators in Michigan and have submitted letters to appropriate legislative committee members opposing the application of pending legislation to coins, medals and tokens. In doing so, I am able to express my concern for coin collectors for whose benefit the legislation is intended and at the same time point out the adverse effect of the legislation on sales of numismatic material at a dealer's store or at a convention.

The type of legislation that is now pending in many states would unduly interfere with the holding of numismatic conventions. A coin dealer would be reluctant to attend a convention in another state in which he must obtain a license, pay a large license fee, hold purchased material for a considerable period of time subsequent to the conventions, keep extensive records containing detailed information about persons from whom he purchases coins during the convention and take thumb prints of all such persons.

During the remainder of my term of office, I shall be pleased to write appropriate letters to city, county and state legislators and other officials in any of the fifty states, pointing out the objectionable features of such laws. Anyone requiring such assistance should provide me with a copy of the proposed statute or ordinance and other relevant information.

Adelphi Institute Plans Second Off-Campus Seminar

Following their first off-campus venture on the West Coast at Monterey Peninsula College in Monterey, California, the Institute of Numismatic and Philatelic Studies is traveling east in the spring to conduct another intensive course in rare coin grading and authenticating. From June 11 through 13, Boston University will host a three-day seminar that will duplicate the popular course-in-residence offered on Adelphi University's Long Island campus.

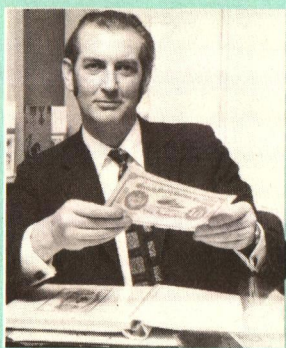

F. Michael Fazzari, assistant director of the International Numismatic Society Authentication Bureau in Washington, D.C., and instructor of the Rare Coin Grading and Authenticating course at Adelphi University, will conduct the lectures and demonstrations. Students will use stereo-microscopes provided by Boston University to develop invaluable skills in grading and authenticating rare coins. A certificate of achievement will be awarded to all students who successfully complete the course requirements.

Plans are underway to hold this seminar in other cities throughout the United States. The serious student of numismatics is invited to inform the Institute of his interest in participating in future seminars.

For further information on off-campus seminars or for information on the Institute's Garden City campus Fall Program, write to Gloria Greene, Director, Institute of Numismatic and Philatelic Studies, Adelphi University, Garden City, NY 11530 or telephone the office of Dr. James F. In a two-part announcement, the medal specialist firm of Johnson & Jensen of Danbury, Connecticut, announced that they will be publishing a line of numismatic books, specializing in medal collecting topics, and that

Don Kagin Appears on Morning Television Show

Joan Lunden, cohost with David Hartman on ABC-TV's "Good Morning America" show, interviews Donald Kagin of Kagin's Numismatic Investments, Des Moines, on the subject of rare coins and currency as alternative investment vehicles. Kagin appeared on the popular morning news program on March 26.

David T. Alexander, formerly of the staff of *Coin World*, will head up the new publication division.

The new series of numismatic books will be created to aid collectors in the specialized numismatic areas of medal collecting. "Medals are collected by series or topics," stated Chris Jensen, partner of the firm. "Ideally we could have an inexpensive guidebook for each topic. We will give first consideration to the more popular medal collecting topics. These might include Washington medals, Lincoln medals, space medals, exposition medals, olympic medals, bicentennial medals, and so on."

"These will be written both in-house, and by outside experts. Of course, Dave will welcome inquiries from authorities on

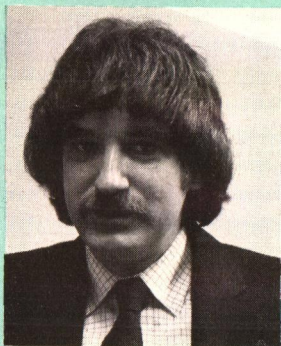

particular topics. We have no schedule yet, but hope to publish a number of these each year."

David Thomason Alexander is an eight year veteran in the field of numismatic literature. He was international editor on the staff of *Coin World* for more than five years and prior to that was executive director of *Numismatic Scrapbook*, formerly published by Amos Press Inc., publishers of *Coin World*. Miami, Florida, where he was a former graduate instructor at the University of Miami and museum director for the Historical Museum of Southern Florida for eleven years. He is a life member of the American Numismatic Association and the Society for International Numismatics, as well as a member of the Society of Medalists and numerous other organizations in the numismatic field.

LITERATURE

New Company Offers Free Price List

Numismatic Professionals Incorporated (NPI) has announced that its first periodic price list is available, free of charge. Some of the highlights offered include a superb 1820 large cent, several 1853 large cents in full mint red condition, a superb proof 1883 quarter, an original 1906 proof set, the finest available cameo proof-like 1903-0 Morgan dollar, and a condition census 1911-D quarter eagle.

Three well-known numismatists co-founded the full-service coin company, which specializes in high-quality U.S. rare coins with an emphasis on very stringent grading standards. Christopher Tracey, president of NPI, left his position as executive vice president of New England Rare Coin Galleries to take on the new responsibilities. The other principals in the venture are W. Mike Hinkle, secretary-treasurer, and Jay Miller, vice president. At

New England Rare Coin Galleries, Hinkle was retail sales director and Miller was the senior numismatic counselor. All three are ANA life members and members of the International Association of Financial Planners.

Tracy, Hinkle and Miller will endorse each coin sold by NPI as a mark of their confidence in it. Says Jay Miller, "We hope to show the numismatic community that a firm can be small and personal and still offer the clients everything that they want and need." In addition, the new firm offers a strong guarantee against counterfeit in the form of a 15 percent premium for any counterfeit coin that has escaped their detection, the premium compounded annually.

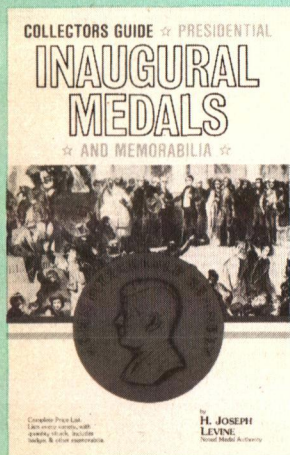

The executive offices of Numismatic Professionals Incorporated are located in Suite 240, Point West Office Center, One Speen Street, Framingham, Massachusetts. The firm's mailing address is: NPI, P.O. Box 1038, Framingham, MA 01701. The toll free phone number is 1-800-343-4926, and in Massachusetts (617)-236-2030 or (617) 872-0900.

Collectors Inaugural Medal Book Published

Inaugural medals—a popular series with medal enthusiasts that receives a tremendous thrust of interest every four years with each new Presidential Inauguration—is the subject of a new book just published for collectors.

The work of three medal dealers, the book was written by H. Joseph Levine, proprietor of Presidential Coin & Antique Company of Alexandria, Virginia, and a

member of the recent Ronald Reagan Inaugural Medal Committee. It was published by Dick Johnson and Chris Jensen, whose Danbury Connecticut firm, Johnson & Jensen, specializes in art medals.

Entitled *Collectors Guide to Presidential Inaugural Medals and Memorabilia*, the book covers all the official medals and badges issued for all presidential inaugural ceremonies since Benjamin Harrison's in 1889. The memorabilia includes other inaugural objects of interest to collectors, such as committee badges, police badges and license plates.

The 120-page paperback book is most useful to collectors because it prices all the official inaugural medals for the first time in one publication. In addition, Levine has given a formula to calculate the price of the silver and gold issues as the value of the precious metal content rises and falls on the metal market.

Along with profuse illustrations of all varieties of inaugural medals and methods collectors have used to house and exhibit their collections, there is a separate section in the

appendix that shows how an inaugural medal is made. A list of sculptors and medallists is also given, providing background data on the artists and companies that have created inaugural medals.

The book retails for \$8.95 and is available from author, publisher, or from numismatic dealers. Address of the publisher is Johnson & Jensen, Box 1085, Danbury, CT 06810.

Also included are several very rare catalogs from now little known houses as Draper Morse, and Bird and Company, and foreign auction catalogs of Adolph Weyl, Jacques Schulman, and Sotheby, Wilkinson and Hodge. Contemporary auction catalogs from a variety of houses will also be available.

A spectacular selection of books on foreign coinage will be sold, highlighted by a major library of nearly 1,000 titles in every numismatic area imaginable, including coins, medals, tokens and paper money from all areas of the world.

Free Report on World Silver Dollars

International Coins & Currency (ICC) of Montpelier, Vermont, has announced the availability of a special 16-page "Silver Dollars of the World" report. Prepared after exhaustively researching the entire field of world silver dollars (or crowns), the report includes a numismatic analysis of the developing boom market for rare world silver dollars within the United States and specific recommendations of promising investment-grade world silver dollars. Among ICC's recommendations are silver dollars of Austria, Canada, Hungary, Israel, Mexico and West Germany.

Selected coin sets from each of these nations are offered in the report and there is a special "best buys" section highlighting outstanding individual silver dollars from each nation.

A copy of the "Silver Dollars of the World" report can be obtained by writing International Coins & Currency, 5 Court Street, Montpelier, VT 05602; or calling toll-free 800-451-4463.

Kolbe Auction of Important Books

Just a year ago George F. Kolbe's sale of rare numismatic books set several records, including \$3,200 for an *American Bond Detector*. At this year's COIN in the Los Angeles Hilton on June 12 & 13, his auction will offer two nice copies of this rare book.

The list of rare and popular books to be offered in this session is too long to be published in full, but some of

the promised highlights include a complete set of the *American Journal of Numismatics*, nicely bound; a number of the popular Chapman Brothers auction catalogs with plates; an original Crosby *Early Coins of America*; one deluxe copy each of Browning's work on quarter dollars and Adams' on pioneer gold; and a complete set of Scott's *Coin Collectors Journal*.

Works on foreign numismatics include a selection of rare books on Islamic coins by Ghalib Edhem and Lavoix; outstanding sale catalogs such as Montagu's English coins and medals, and Arts Classica ancient coins; Neuman's multivolume work on copper coins of the world; the Weber collection of Greek Coins; and Cochran Patrick's work on Scottish coins.

All aspects of

numismatics will be covered by the more than 1,000 lots in this mail bid and floor sale. The catalog, including the post-sale prices realized list, may be had for \$5 from George F. Kolbe, 23881 Via Fabricante #511, Mission Viejo, CA 92691.

Pre-Publication Offer For Numismatic Trade Directory

C.W. Brown, Inc., Publications Division, has announced the pre-publication offer of *The Numismatic Trade Directory*. Charles Baker, a spokesman for the firm, expressed that "the book will list thousands of dealers, collectors, publications, and organizations."

Collectors and dealers will be listed separately under alphabetically arranged headings of specialization, along with their addresses and organization affiliations.

A \$3.50 listing charge is paid by each person or firm listed and display advertising is available. Published and updated yearly, the directory will also include over forty pages of articles concerning investing and collecting by such well known authors as Paul Anderson, Charles Baker, D.L. Crumley, C.W. Brown, Frank Kovich, Dale Shaw and others.

The first printing is scheduled for release in early fall in time for Christmas gift-giving. The regular price will be \$4.95, but for a limited time only readers may reserve copies for \$3.95 each.

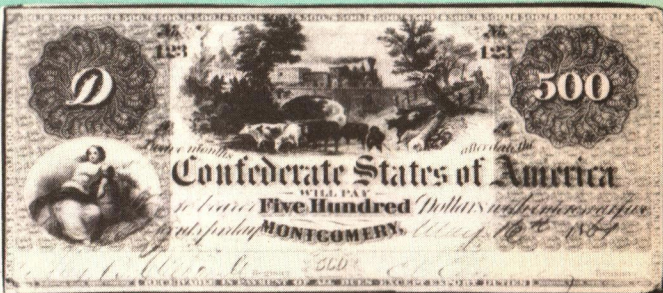

Those wishing to be listed or to place an ad should write for a free rate card and application by the June 30, 1981, deadline. Orders may be sent to C.W. Brown, Inc., Publications Division, P.O. Box 4832, Shreveport, LA 71104.

NICKEL & DIME STUFF

Garrett IV Sale Sends Auction Total over \$25 Million

Record prices were set in Los Angeles as Part IV of the Garrett Collection was auctioned to the order of Johns Hopkins University by Bowers & Ruddy Galleries. William D. Hawfield, Jr., president of the firm, commented that the last in the four-part sale was devoted mainly "to the specialized collector, and featured medals, tokens, obsolete paper money, and other issues. Bidding activity was intense from the onset, with nearly all items selling to the several hundred bidders who came from all parts of the United States to participate in what has been called the sale of the decade."

A 1795 engraved Washington oval silver Peace medal sold for \$65,000,

setting a record for the highest price any American medal has ever brought at unrestricted public auction sale. The 1792 silver center cent, one of only a dozen known, brought \$95,000, followed closely by a Choice Uncirculated 1792 Birch cent in copper that brought \$200,000, the world's highest price ever realized for any copper coin of any issue. An unlisted Civil War token struck over an 1861 Liberty

seated quarter brought \$4,400, the highest price ever realized for a coin within the Civil War token series.

The major focus of attention was on Lot 2340—the 1787 Brasher Gold Doubloon with hallmark on eagle's breast. The coin, in Very Fine condition, is the only specimen known with the hallmark in that location. Bidding for the piece opened at \$200,000 and continued to climb until finally, at \$625,000, the coin had a new owner via a Los Angeles attorney who was bidding for an anonymous client.

The total amount realized during two days of bidding activity was \$2,400,205, bringing the total realized for the four sales to \$25,235,360—the largest amount of money realized for any collection of fine art and property ever auctioned in America and over three times the price ever realized by any other rare coin collection sold at public auction sale.

Other highlights of the Garrett IV sale include: 1792 Washington Roman head cent—\$13,000; 1792 Washington half dollar with large eagle reverse in silver—\$16,500; 1792 Washington half dollar in silver, 15 star

reverse by Peter Getz—\$24,500; Uncirculated 1792 Washington half dollar by Getz, struck in copper—\$32,000; another 1792 Washington half dollar in copper, but with ornamented edge, close to Uncirculated—\$34,000; undated (1792) Washington born Virginia copper Uncirculated—\$22,500; Washington funeral medal with skull and crossbones reverse, gold—\$37,500; 1797 Washington Masonic medal—\$45,000; 1818 Washington Market Chowder Club medal in gold—\$25,000; group of three Washington "Season" medals—\$17,500, \$6,500, and \$17,500; Jefferson Peace medal—\$17,000. Silver and gold bar by Molitor—\$6,200; Knight and Company silver ingot—\$6,400; United States Assay Office, New York, gold ingot dated 1911—\$6,400; 1790 Diplomatic medal in bronze—\$16,500; Benjamin Rush medal in silver—\$8,000; Charleston (South Carolina) copper slave badge—\$4,000; 1861 original Confederate cent—\$12,500; engraved Lincoln silver award medal—\$26,000; 1853 octagonal California gold

piece, Lee-3B—\$5,400; the 1742-dated Brasher Lima-style Doubloon—\$80,000; 1792 Birch cent in white metal—\$90,000; 1792 silver half dime—\$36,000; 1792 copper dime with reeded edge—\$54,000; and the 1792 copper dime with plain edge—\$45,000.

At the conclusion of the sale a special award ceremony was held. Tributes to Q. David Bowers, who cataloged the four Garrett Collection Sales and who wrote the accompanying volume, *The History of United States Coinage as Illustrated by the Garrett Collection*, were read by Virginia Culver, president of the Numismatic Literary Guild, and by Margo Russell, editor of *Coin World*. Ed Rochette, executive director of ANA delivered his congratulations and those of the ANA's 40,000 members. Plaques were presented to Bowers & Ruddy Galleries employees who played important parts in the sale, and to George Bennett, the auctioneer.

Copies of the fourth Garrett Collection Sale, including a list of prices realized, are available for \$20 postpaid while the limited supply lasts. Copies of the large illustrated book, *The History of United States Coinage as Illustrated by the Garrett Collection*, are available for \$37 postpaid. World's First Check Auction

An example of Britain's earliest surviving cheques, dated 1664, sold for £260 in the world's first auction of cheques held by Stanley Gibbons in association with James of Norwich in London on February 26. The sale total was £12,500.

With items selling for £2 upwards, the auction was important in establishing price trends. Early cheques sold best, along with those bearing interesting signatures. A cheque signed by George Bernard Shaw sold for £160 against an estimate of £60. Two others of 1787 issued by Foster Lubbock Bosanquet & Co., made out for £10,000 and £5,000, sold for £160 and £90 respectively against estimates of only £45.

Auction Prices Reveal Scripphily on the Rise

A total of more than \$111,000 was realized by Stanley Gibbons Auction Galleries in a recent New York bourse and auction of defunct bonds and stock certificates conducted by R.M. Smythe & Co., Inc. These handsome relics of financial history, many issued by bankrupt companies and overthrown governments, are now sought by collectors of "scripphily," the name given to the rapidly growing new hobby.

A term coined two years ago in England, scripphily describes the collection and trading of old stocks and bonds. Although obsolete, worthless, and long devoid of financial value, they are prized by collectors for their antique value, beautiful rare engravings, lithographs, vignettes and decorative motifs characteristic of days gone by.

The highest single price realized was \$14,000 for an 1898 Chinese 500 pound sterling bond for a 4½ percent gold loan, countersigned by the Deutsche-Asiatische Bank of Berlin. Only 20 copies of this rare item, believed to be the world's most valuable "busted" bond, are thought to be in existence today. The second highest price was \$7,500 for a 1912 Russian bond of 4,725 roubles issued by the city of Nikolaef for a municipal loan.

Bidding for American certificates was especially spirited at the sale, with most lots of U.S. material realizing above pre-sale estimates. The highest price for an American item was \$1,200 realized by an 1878 certificate for 50 \$100 shares of the Standard Oil Company, personally signed by company president John D. Rockefeller. A 1925 share in the Edison Phonograph Distributing Company, signed by Thomas A. Edison, was sold for \$475, nearly twice the \$275 estimate. An 1872 certificate for 100 \$50 shares in the New York and Harlem Rail Road company, signed by W.H. Vanderbilt, realized \$450.

Bonds issued by several Southern states before and during the Civil War were also popular. An 1833 bond

for \$1,000 issued by the State of Mississippi went for \$950. A bond issued by the Confederate States of America in 1863 for a 7 percent cotton loan realized \$325.

Although relatively inexpensive, bonds and stock issued by various U.S. railroad companies with odd and colorful names were in great demand. An 1851 certificate for 47 \$100 shares in the Georgia Rail Road and Banking Company went for \$85, while an 1895 bond issued by the Brooklyn and Brighton Beach Railroad Company fetched \$90.

Prices Realized at Superior Auction Outpace Estimates

Superior Stamp and Coin Company's catalog for its February 2-3 auction included estimates "representing either the owner's idea of value, or our professional opinion as to what they should bring." The catalog indicates that "in any event, they are only estimates and you may bid higher or lower." And indeed, this is exactly what happened in the Westside Room of the Century Plaza Hotel, where prices realized varied widely from 50 to 200 percent of the estimate.

The 1249 lots grossed \$1.6 million, and the rarity, quality and current popularity of many coins caused bidders to pay well above Superior's estimates, an excellent indication of the present and future areas of strength in the rare coin field.

Copies of the handsomely illustrated sale catalog, along with prices realized are available as long as the supply lasts for \$5 from Superior Stamp and Coin Company, 9301 Wilshire Boulevard, Beverly Hills, CA 90120.

GRADING

"We should make a concentrated effort to remove classification from the realm of opinion over into the area of objective standards universally accepted."

LLOYD B. GETTYS AND EDWARD M. CATICH, 1956

The Long Road to Objectivity

Collectors and dealers alike have long called for finer discrimination regarding a coin's condition and for more accurate and consistent terms to define that condition. Over the past several decades the cry for help became almost deafening as inflationary prices caused the most minute differences in the condition of a high quality coin to mean a crucial difference in its competitive value. Aggravating the need for greater uniformity in the designation and description of coins was the practice of overgrading by unscrupulous dealers. As the system for grading was refined to include more levels, there was even more latitude for misrepresentation.

Hearing the cry was the American Numismatic Association which lists as one of the objects in its Federal Charter, "to assist in bringing about better cooperation between all persons interested in the coinage, circulation, classification, collection, sales, exhibition, use and preservation of all coins, bills, and medals." Out of the association's desire to effectuate this objective and in cooperation with the Professional Numismatists Guild, the ANA Grading Board was finally established to develop acceptable standards for industry use and the results of this effort—the ANA

and James J. Jelinski, LM 1838*

Grading Service operating under the Official ANA Grading Standards for United States Coins—represents the current trend in numismatic grading. But it was a long road to find objectivity in the crucial judgment of condition, and the way has been strewn with both criticism and hope.

Subjective vs. Objective

Most dealers and collectors long regarded grading as an art with, at best, fleeting efforts to become a science. Movement toward the objective (science) from the subjective (art) was a function of an educative and communicative process in which dealers articulate their standards and resolve differences among themselves and their conclusions are communicated to client populations.

Complacency in the past with a grading system that condoned subjective evaluation resulted in a distortion of the process. It is a factor of human nature that the owner of a coin will view its condition as being a higher grade than will the purchaser of the coin. In addition, as demonstrated in auction catalogs, different persons across time grade the same coin

differently. Many dealers as well as clients consider variables such as a coin's color in determining grade, yet this variable does not relate to a grade designation in any reliable manner. While a given dealer or collector may prefer a given patina and believes it is important to include this factor in the coin's description, the desirability of that patina is not universal, and thus must be excluded as a determinant of objective condition.

There is considerable historical precedent for the shift from subjective to objective standards. In cataloging the Parmelee collection in 1873 for purposes of producing a "modern day guide" of U.S. coins, Seavy introduced a rudimentary numbering system for grading, ". . . 0 for proof, 1 for uncirculated, 2 for very fine, 3 for fine, 4 for good, and 5 for ordinary . . ." Alfred Reschke called for a less impressionistic rating by proposing a percentile system from 66 to 100 with 66 to 70 representing poor, and uncirculated being 96 to 100. His five point system for descriptive phrases translates into the conventional 60, 63, 65, 67, and 70.

L. Miles Raisig went so far as to propose a grading system based on weight. He felt that a weight grading system would provide numismatics with a scientific method for grading, to augment the inconstant variables of vision, memory, habit, emotion and imagination. If a coin weighed less than 80 percent of its original weight, it was poor. Obviously this system represents an extreme in the attempt to objectify grading.

Adjectival Grading Systems

Adjectival descriptions are, for the most part, efforts at creative writing. In an article entitled "AU or BU" written by Loyd B. Gettys and Edward M. Catich in 1956, a fascinating array of terms in use at that time for coin descriptions is listed: "about uncirculated; almost uncirculated; uncirculated but showing slight wear on the high points; better than very

fine; good, catalogs \$30.00 uncirculated; extremely fine plus; few spots but uncirculated; good to very good; fine for coin; fair, excellent for beginner; about uncirculated plus; extremely fine, mint luster, etc." In an effort to combat the ambiguity of such descriptions, pictorial diagrams and line drawings were developed over the years to establish an objective standard to accompany the description.

Gettys and Catich used photographic reproductions to point out that the highest part of the devices are those that wear first and suggested this observation as a method in determining whether a coin was AU or BU. Harold H. Gupton, who developed a very elaborate grading system based also on the high features assessment using precision instruments, recognized that his standards were more rigorous than most and introduced his system with the comment, ". . . the minimum grade requirements of this system are, in some instances, higher than those set out in other grading books."

Aside from "grading cards" used in the early 1960s for some denominations and grades, the first broad attempt to picture coin grades appears in *Pictorial Guide to Coin Condition*, published in 1960. Twentieth century coins were pictured in various grades including uncirculated; almost uncirculated (AU) was not included.

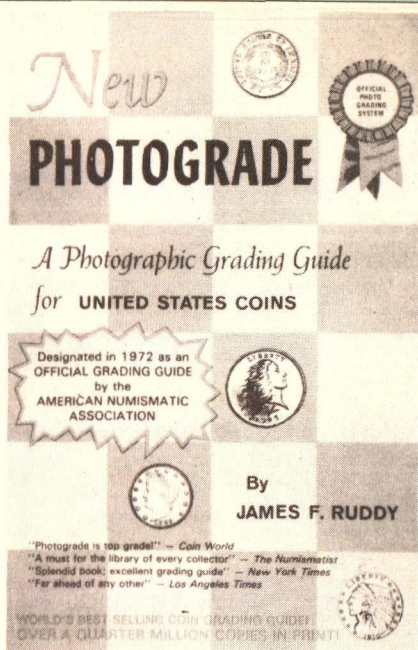

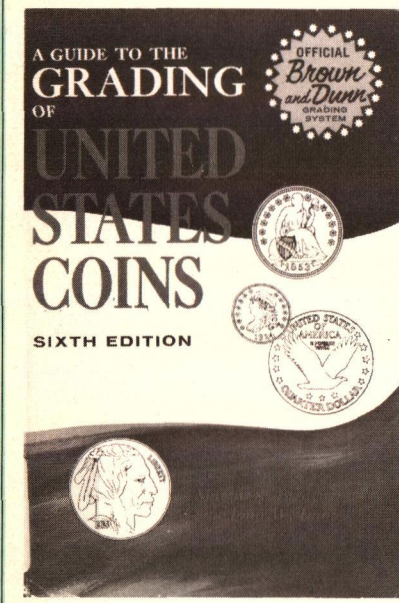

Although Brown and Dunn produced the first popular grading guide in 1958, it included descriptions only. Photos were shown of coin types only in a later revised edition. It was not until the 4th edition (1966) that they introduced the line drawing method which was in vogue for many years, having seemingly been adopted by the ANA as an official system in 1967. In the 5th edition (1969) of the Brown and Dunn guide a further refinement of their system appeared called the new B & D system, an

adjectival system using a range of condition and 29 numbers to abbreviate an otherwise lengthy description of condition. For example, "VG-B-9-O-X" would be interpreted as describing a coin that is normal Very Good condition except that it has a single rim nick on the obverse at ten o'clock. In this case seven symbols take the place of nineteen words.

Photograde refined the use of photography in numismatic grading by combining pictures of coin grades from about good to about uncirculated with adjectival descriptions. No pictures were given of uncirculated coins in *Photograde* because "It would be difficult to show the absence of wear in a photograph." In a later edition there appears "The Numerical System of Grading" which attempts to integrate adjectival descriptions with numerical labels.

Numerical Systems

In considering the use of numerical ratings, its is clear that the numbers are merely a short-hand description device. If numerical systems are laid over a confused evaluative structure,

the numbers will mean little more than the adjectives they replace.

Although numbers had been used by Seavy (1873) and proposed by Reschke (1937), it was not until 1949 that the number system made its mark on the numismatic world. Why numbers? The process of grading a coin is complex, but its objective is to place the coin's condition somewhere on a single continuum of desirability or value. In describing the coin's position on that continuum, the stark definitiveness of numbers serves better than do the expressive flexibility and richness of adjectives.

In *Early American Cents*, William H. Sheldon presented a summary of previous cent literature along with several innovations, including a rarity and grading scale. His book, one of the most sophisticated works in numismatics, provided a system of numerical grading that is still in use today.

A brief discussion of measurement will help to explain the refinement of the Sheldon system. In general,

LARGE CENTS

FINE

Both hair cords around knots of hair must be complete although they will show weakly. There will be considerable detail in hair lines.

VERY FINE

Both hair cords must stand out although they will be worn. Wavy strand of hair along inside hair cord must be well defined. Considerable detail must be present for hair above coronet and around ear.

ABOUT UNCIRCULATED

Only slight wear will show on all high spots of coin, including hair just above the eye on obverse and leaves in wreath and ribbon on reverse.

Special Notation: Some of the cents of 1836 and 1839 are not struck boldly on obverse. This is especially true on the date of the 1836 coin.

VERY GOOD

About one-third of the hair detail will be visible. The hair cords will begin to show. "LIBERTY" will be full.

FINE

Most of the major hair detail will be visible. The hair cords will show weakly.

The hair will be worn flat on the highest points. Both hair cords will show plainly.

EXTREMELY FINE

The hair will be sharp with weakness showing only above the forehead and at the highest point on top of the head. Hair cords will stand out sharply.

ABOUT UNCIRCULATED

Only a trace of wear will be visible on the highest points of the hair.

Photograde, by *James F. Ruddy*

"... I am not sure that the world would be any better without suckers in it, or even without shady coin dealers, but one object in writing this book is to try to give the former a little better run for their money and to provide a better bait for the latter."

WILLIAM H. SHELDON, 1958

measurement is the assignment of numbers to objects in such a way that the numbers represent specified properties of the objects. A measurement scale is a set of rules for assigning numbers to a specified set of objects. A numerical coin grading system seeks to assign numbers to coins so that the numbers represent, to some degree of precision, desirability of the coin's condition. The first requirement in establishing a numerical grading system is a set of number-assignment rules which can be applied consistently by different graders and by the same grader on different occasions.

The measurement level of a scale is determined by the relationship among the numbers which, as a consequence of the assignment rules, accurately reflect relationships among the properties of the objects. There are three levels of measurement that might be achieved by a numerical coin grading system.

At the ordinal level of measurement, numerical order (as determined by the greater-than and less-than relations) meaningfully reflects an order among the various properties. In "measuring" two coins under an ordinal grade scale, a higher number must be assigned to the coin with the more desirable condition. The basic nature of desirability makes an ordinal grade scale a relatively simple matter to achieve, i.e., a fine coin is better than a good coin.

The interval level of measurement has the same requirements as the ordinal level but, in addition, requires that differences between numbers meaningfully reflect differences between properties in degree or

amount. Suppose there were universal agreement that VF is as much more desirable than F as F is more desirable than VG. If 8 were assigned to VG and 12 to F (a difference of 4) on an interval grading scale, then 16 (4 more than 12) would have to be assigned to VF.

At the ratio level of measurement, the conditions for an interval scale are satisfied; in addition, ratios of the assigned numbers meaningfully reflect ratios of degrees or amounts of the properties. Suppose it were generally agreed that EF is twice as desirable as F. If 12 were assigned to F, then 24 would have to be assigned to EF on a ratio grade scale.

Sheldon strove to develop a ratio scale of coin grades, not by means of explicit judgments about desirability, but by using a favorite assumption of economists: Price paid is a quantitative expression of desirability. By restricting his attention to large cents, Sheldon held constant a wide variety of factors that affect price, such as metal, face value, etc. Further, he made comparisons of prices for various grades only among pieces of the same variety, thus holding constant other price-related factors. With all of these controls, only grade was left to vary systematically with price. Therefore, by assigning numbers to the grades so that the ratios of those numbers corresponded to the ratios of the prices associated with the grades, Sheldon constructed a ratio measurement scale for coin grades. For example, based on the then current market values of large cents of the same variety, an uncirculated coin was five times as valuable as a fine and 15 times as valuable as a coin graded good, so Sheldon assigned 60 to

uncirculated, 12 to fine, and 4 to good.

It should be emphasized that the numbers were chosen primarily to reflect price ratios, not necessarily to indicate the number of grade categories. For example, the existence of 11 integer numbers from 60 through 70 does not imply that 11 reliably discriminable grades exist in that range.

Sheldon's system is by far the most sophisticated and reflects the best understanding of both the coin and market conditions. Other attempts to develop numerical structures are adaptations of Sheldon's system which distort the ratio scale of desirability and are, therefore, less reliable instruments. Renowned dealer and numismatist, Abe Kosoff, has presented several arguments for retaining the 1 to 70 system over any other range of numbers.

Continued use of the Sheldon system would eventually require periodic adjustments to correlate with market conditions, since ratios of Sheldon numbers may not accurately reflect ratios of associated pieces. This, however, does not require any adjustments to the structure itself.

A Basis for the Evaluation of Uncirculated

The validity of a numerical system does, however, also depend on the reliability of the evaluative process. The properties of the coin crucial to its evaluation must be clearly defined and agreed upon.

In a review of past literature on grading, the definition of uncirculated differed significantly among the grading guides, reference works, and articles on condition. However, two broad categories of evaluation emerged: those qualities resulting from the minting process defined one category while disposition of the coin following its minting defined the second.

Lustre, a minting property, was defined by several sources as a coin property resulting from equal and

smooth distribution of metal flow across the surface of the coin that reflects light in a circular fashion. Strike, the second crucial minting property, is defined as the clarity of the device resulting from the impact of the dies on a planchet. Lustre and strike, then, are properties of uncirculated coins determined before the coins are even ejected from the press. It is essential when determining the level of preservation within the uncirculated grade, that variation in these minting properties be considered.

After evaluating and assessing the properties of uncirculated coins related to the minting process, the second broad category for discrimination to be considered is related to a coin's disposition after minting. By definition, any uncirculated coin has been maintained out of circulation. Non-circulating marks, not caused during the minting process, are a result of either the method of mint handling, distribution or storage of coins (for example, bag marks or slide marks), or cabinet friction.

A coin graded uncirculated is given that description through a complex and subjective decision-making process involving a consideration of all the above factors. The overall appearance of a coin determines its condition, not any one factor in particular. A similar process is used in determining the state of preservation of a proof coin.

The ANA Grading Guide and Grading Service

In 1967 the ANA adopted *Brown & Dunn* as an official grading guide for U.S. coins. In 1973, *Photograde* was recognized as a supportive device to further define grade judgements. The trend toward a more rigorous system culminated in 1976 with the presentation to the ANA Board of Governors of a 267 page manuscript assembled by the ANA Grading

Official ANA Grading Standards for United States Coins

Committee headed by Abe Kosoff. Through the efforts of many of the hobby's leading numismatists, particularly Abe Kosoff, Kamal Ahwash, Michael Brownlee, John Hansen, Myron Kilman, Dennis Loring and Ken Bressett, the dream of an official *ANA Grading Guide for United States Coins* was realized with the manuscript's publication by Western Publishing Company in December 1977. In November of 1978

Tom DeLorey joined the ANA staff in Colorado Springs and implementation of the grading service was underway.

As Abe Kosoff noted in his committee report to the Board in 1976, "... the very thought of a future grading service has already made itself felt. Reports came to me that certain auction catalogues reflect more conservative grading than was true in the past." Since its inception the grading service has been subject to both criticism and praise, and justifiably so. But as to its success, the growing demand for this service speaks for itself. In March of 1979, after only a few months of operation, the service graded 174 coins. By March of 1980 the monthly total of coins graded reached 1,022.

In March of 1981, the ANA Certification Service received 5,151 coins, at least 80 percent of which also requested a grading opinion.

Grading is still, and always will be to some extent, a subjective interpretation of the relative value of a coin's condition, and it will always be surrounded by some controversy. It is the ANA's hope, however, that in establishing standardized descriptions acceptable to the entire community and providing an opinion by a third party, they offer collectors some of the objectivity they have sought for so long.

ALFRED RESCHKE, 1937

An Outlook on Grading from the ANA Grading Service

by Thomas K. DeLorey, ANA Senior Authenticator

The basic problem of coin grading was defined by Walter Breen long ago as a function of human nature and socio-economic pressures. Specifically, Breen said "Give me a G . . . Give me an R . . . Give me an E . . . E . . . D."

It is an undeniable fact of human nature that just about every one of us mortals is inclined to look favorably upon that which is ours. We each have the most beautiful wife, the most intelligent child, and the sportiest looking car of an identical run of 80,000 units. Is it any wonder, therefore, that we also tend to be just the least bit prejudiced towards the coins that we collect and/or sell?

Indeed, the collector is just as much a part of the problem as the dealer. Who among us has not seen the proud owner of an AU rarity who firmly believes it to be fully Mint State, and who is psychologically unable to see the wear he does not want to see? Is this person not just as guilty of overgrading as the dealer who overgrades simply for a profit, whether or not he ever tries to sell his rarity?

Years ago overgrading was not as much of a problem as it is today simply because there was not as much of a financial incentive to overgrade, and when an overgraded coin was sold the

loss to the buyer in actual value was minimal. The American Numismatic Association Certification Service (ANACS) has for some time been certifying and grading portions of a collection that was put together in the 1920s. Each coin in the collection was bought from B. Max Mehl as either Uncirculated or Proof, and, indeed, most of the coins are either Uncirculated or Proof; a few of them, however, have proved upon examination to be either circulated or impaired. At current values this can mean a difference of several hundred dollars in the value of one of the coins, as most of them are 19th century or early 20th century type coins.

However, at the time the coins were sold the actual loss to the collector would have been only fifty cents to a dollar, as the sale price of a Proof Liberty Seated quarter was only a dollar or two.

In the late 1950s and early 1960s the values of coins began to escalate, pushed up in part by the founding of *Numismatic News* in 1952 and *Coin World* in 1960. These publications helped make collecting popular among the masses, and also made it possible for any collector, competent or not, to proclaim himself a mail-order dealer.

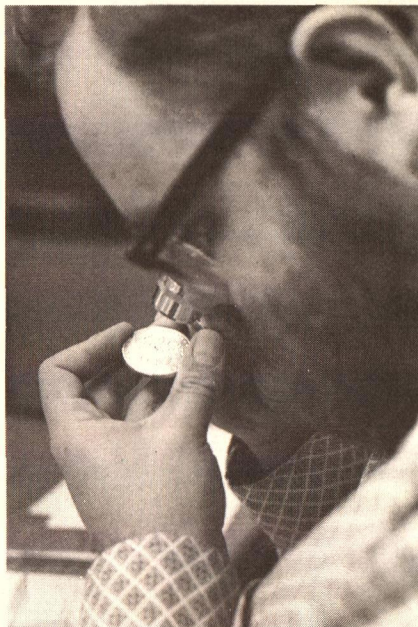

This combination of rising prices

and a huge increase in mail-order coin dealing created both the motive and the opportunity for the deliberate overgrading of coins, despite the vigorous and continuing efforts of these and other publications to police their advertisers.

Throughout the 1960s the grading of coins became at times an exercise in creative writing, as adjective was piled upon adjective to increase the apparent desirability of a coin and thus its price. Such a description might indeed be accurate for any given coin, but the problem with random adjectives was that no two dealers (or collectors) used exactly the same words in the same ways. Thus two coins described as significantly different might appear exactly the same, while two coins described basically the same might appear totally different.

In the 1970s the growing protests against adjectival diarrhea resulted in the gradual adoption of a modified form of the numerical grading system first introduced by Dr. William Sheldon in the late 1940s. Though the specific numbers used in this system were originally determined by the 1948 dollar values of common variety 1794 cents in the various grades, it was generally accepted that these numerical values could still be used to represent the grades regardless of the fact that the dollar values of the coins were continually rising.

One drawback to the Sheldon system was that it was designed for a series that was normally found in circulated condition, with the result that it was much better suited for grading Very Fine coins than Mint State ones. As originally written it allowed for only three different levels of Mint State coins, one of them being the perfect or MS-70 coin which is virtually non-existent. This left only two grades, MS-60 and MS-65, to

Thomas K. DeLorey, Senior Authenticator

describe every other Uncirculated coin.

In theory, however, one could conceivably with time and patience array an entire bag of Uncirculated silver dollars (or any other coin) into 1,000 different grades, each insignificantly better than the next. Though it would be semantically impossible to describe why any given coin was one grade while its immediate neighbor was not, it would be generally possible to say that one particular range of coins was better than another.

Because the majority of Uncirculated coins tends to fall at some point on the continuum between MS-60 and MS-65, there was inevitably the tendency on the part of some coin owners to call those coins which were closer to MS-65 than MS-60 true MS-65s, and to price the coins at something less than a true

MS-65 price to reflect the condition. As long as both parties to the transaction knew what was going on nobody got hurt, but unfortunately informed sales of this sort eventually became the exception rather than the rule.

Here again the collector became a part of the problem, as people began ordering coins labeled MS-65 at MS-63 prices in the hope of being able to resell them at MS-65 prices for a nice profit, ignoring the fact that the dealers selling the coins would have asked the MS-65 prices if they thought they could have gotten them. Eventually there developed a double standard used by much of the industry, with a great many dealers selling MS-63 and better coins as MS-65s (which the collectors demanded) at prices appropriate to the actual condition, and buying the coins back for their inventories at MS-63 prices. Again the collectors bear a part of the blame for this situation for having demanded only MS-65 coins (which are indeed quite scarce as a proportion of the populations of most series) and refusing to buy MS-63 coins at MS-63 prices on the grounds that "another dealer would sell me the same coin in MS-65 for the same price." Thus the dealer conscientiously trying to sell perfectly collectible MS-63 coins at MS-63 prices found himself losing sales just because he refused to go along with the system.

When the *Official ANA Grading Standards for U.S. Coins*, based on Sheldon's system, was published in 1977, it included the unfortunate limitation of having only three Mint State grades to choose from, one of them being the virtually unattainable MS-70. However, by that time the price spread between MS-60 and MS-65 coins had grown to two or three hundred percent, so that naturally anyone owning a coin that was almost

but not quite MS-65 was very reluctant to downgrade it to the MS-60 level and realize only an MS-60 price. There was a definite negative financial incentive involved in using the ANA grading system for Mint State coins.

Therefore, when ANACS began grading coins based upon the official ANA standards in March 1979, it quickly realized that the two practical grades of MS-60 and MS-65 were not enough. Because many dealers in the meantime had adopted intermediate grades such as MS-61, MS-62, MS-63 and so on, it was decided that two of these intermediate grades should be added to the official ANA standards. MS-63 was chosen because it implied a coin significantly better than MS-60 but not quite an MS-65, while MS-67 was chosen simply because it was equally distant from MS-65. These grades were formally approved by the Board of Governors in August 1980.

Since it was founded, the ANACS grading service has tried to work with both collectors and dealers in refining the interpretations of the various grades, with basically favorable results. ANACS has learned that it was interpreting certain standards too conservatively, when grading gold coins for instance, while the hobby in general has tightened up a number of overly liberal interpretations that had crept into a number of series. Though there are still some differences, they can be and are being discussed.

What is most encouraging, perhaps, is the fact that collectors are now more willing to buy MS-63 coins graded and priced correctly as such, without forcing the dealers to inflate the grades before they buy the coins. Though it is unlikely that every grading problem can be resolved, the tendency towards realism on the part of both the collector and the dealer can only be mutually beneficial in the long run.

NUMISMATIC VIGNETTES

■ "Hazardous Material Law Will Include Veto Power," said a newspaper headline reporting on a bill before the Colorado Legislature. Only in Denver would veto power be considered a waste material, and a hazardous one at that.

■ Regardless of your political leanings—to left or to right, upward or down—most of you will agree that we don't need *more* laws. One of our biggest legal problems is the complexity of practically all of our laws. Consider, for example, the rather recent law known popularly as "Truth in Advertising." In front of me now is an advertisement for "Five Morgan Dollar Investment Collection." "These Solid Silver Dollars, 412.5 grains of 900% Fine Silver," actually contain 3.867 oz. of fine silver, although this is not stated in the ad. "Some Morgan Silver Dollars sell for as much as \$20,000." The advertiser has housed these coins "into exquisite Solid Silver Investment Collections . . . in a handsome presentation case" for your purchase at \$180 (incl. \$5 shipping).

Probably every word of the advertisement is true but we are not told that the five coins are worth little if any more than bullion value because of being quite worn common dates. You'd be paying \$46.55 per fine ounce for silver that can be purchased for about a third as much.

Another popular ad offers "14K Gold Chains, \$12 (incl. \$2 shipping) until March 30." The chain is 16 inches long and even the clasp is 14K gold. All true, I'm sure, but how much gold are you getting and at what rate per fine ounce? Compliance with "Truth in Advertising" gives little or no assurance against a first class "ripcoff."

My third offering is of an advertise-

ment that does *not* hold to the truth. A local savings and loan concern offers a "cloisonné" pendant to those who open a new account. Most likely the pendant is pretty and *resembles* cloisonné, but it is not the real thing any more than a nicely polished coin is a genuine proof.

Regardless of fine adjectives and nice intimations, it's your money that's being spent so you have every right to be given all the pertinent facts. Look before you leap, and try before you buy!

■ Probably most of his constituents wish President Reagan success in his proclaimed intention to trim \$40 to \$50 billion from fiscal 1982 Federal spending. Of course this isn't a one-man job, but even if Reagan can sway Congress to his proposals, there are still the many financial obligations to which the government is committed. Consider, for example: some 35 million people are drawing Social Security checks, nearly 5 million are federal civilian or railroad retirees or on veteran pensions; more than 22 million receive food stamps; and certainly the 28 million on Medicare draw a substantial sum from the Treasury. And don't forget that top obligation which *must* be met in full and on time—interest on the public debt—that comes to nearly \$100 billion this year.

It is not my intention to become a political partisan, nor am I an economist. The above is offered merely as food for thought—chew it well!

■ An old friend for whom I did a minor favor responded with a brief memo with which he enclosed a copy of the following verse by Grellet. Probably most of you have read it before but it's one of those expressions that one cannot recall too often.

KINDNESS

*I shall pass through this world but
once.*

*If, therefore, there be any kindness
I can show,*

*Or any good thing I can do,
let me do it now;*

*Let me not defer it or neglect it,
For I shall not pass this way again.*

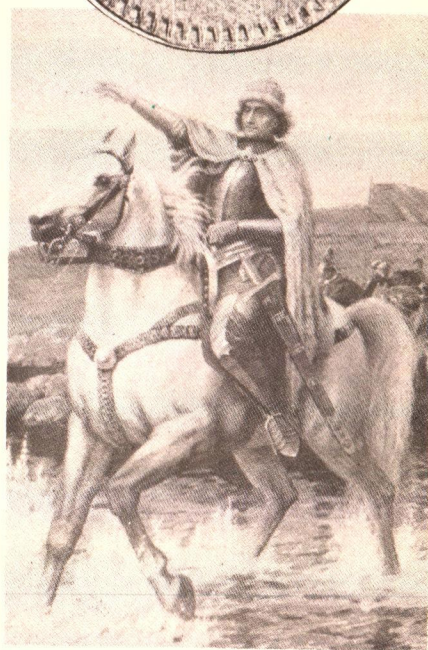

Lithuanian-American

by Frank Passic, ANA 90821

An examination of the history of Lithuania uncovers one of the most fiercely nationalistic people ever to struggle for national autonomy. Located on the eastern shore of the Baltic Sea, Lithuania is today bounded on the north by Latvia, on the south by Poland, and on the east by the Soviet Union. At one time in the middle ages Lithuania's empire reached from the Baltic to the Black Seas, covering 350,000 square miles. When Lithuania came under Russian control in 1795, the Russians did all they could to "Russify" the Lithuanians, but they were continually met by stiff opposition. During the last half of the 19th century, oppression increased as parochial schools closed and printed matter was forbidden. Repressive measures were forced upon the people, adding to the misery of the Lithuanian nation, which already suffered from famine and mass unemployment.

Hundreds of thousands of Lithuanians fled their homeland. Emigration to America eventually totaled 635,000 individuals, approximately 20 percent of the population of Lithuania! They arrived at Ellis Island impoverished, penniless, and unable to speak the English language but full of hope—the hope of freedom, a new life and unlimited opportunity.

Helping the Lithuanian immigrant was the Brooklyn Chapter of the Lithuanian Alliance of America, which gave aid to those at Ellis Island. The Brooklyn Lithuanian-American Citizens Club held a special conference in May of 1911 to plan a strategy for helping those who were scheduled for deportation back to Lithuania. The No. 4 issue of *Tevyne* (1896) stated, "At present, masses of Lithuanian emigrants are arriving in New York. Every ship from Hamburg brings tens and hundreds of Lithuanians. Many are sent back and the Alliance's Brooklyn

Chapter is working its hardest for the good of those poor peoples . . ."

In general, the immigrants stayed in New York only briefly, then moved westward to Pennsylvania, where they found employment building railroads and working the coal mines. Numerous

Lodge Tokens of Chicago

Lithuanian organizations, newspapers, and societies were organized in Pennsylvania. These served as the prelude to those that were to be established later in Chicago as Lithuanian immigrants moved westward. Many Chicago lodges were actually branches of those that were first established in Pennsylvania.

The first group of Lithuanians came to Chicago in 1870, when eighteen men arrived with a railroad crew. Because of its central location with industry and development, Chicago became the goal of the thousands of impoverished Lithuanian immigrants seeking a new life. Groups of Lithuanians came in 1880 and 1885,

with the first colony being established on the North side of the city. After that, the influx of Lithuanians to Chicago grew at an enormous rate. It is estimated that between 1880 and 1914, more than 47,000 Lithuanians settled in the city, congregating in the Bridgeport and Town of Lake districts. By 1923, the Lithuanian population had grown to over 90,000, confirming the fact that Chicago contained the largest Lithuanian population of any city in the world, even more than Kaunas, Lithuania.

The Bridgeport section, where many Lithuanians settled, was named after a Lithuanian immigrant from Tilsit (East Prussia/Lithuanian Minor) named Ansas Portas. Portas owned land on the south side of the Chicago river at a bridge crossing, and people referred to the area as the "bridge of Portas," which was later changed to "Bridgeport." The Bridgeport section served as the nucleus of the Lithuanian community from the early years of immigration to Chicago through the era of World War I.

Due to the difficulty they had in obtaining jobs, Lithuanian immigrants began to settle around the stockyards where work was available in the slaughterhouses and steel mills. By World War I, approximately 25 percent of the ethnic work force in these industries was Lithuanian, and it is estimated that a total of 100,000 Lithuanians worked in the stockyards in Chicago during their existence. The grim and horrible conditions Lithuanian workers faced there were the theme of the classic novel, *The Jungle* (1906), by Upton Sinclair.

The Lithuanian contribution to the city of Chicago is significant in several ways. First, it provided the city with an added labor base upon which the city's industries grew and prospered. Second, it accelerated the building of ethnic neighborhoods, adding to the distinct variety found in the city's cultural life. Third, it spurred the formation of new businesses as the Lithuanians became organized and more affluent.

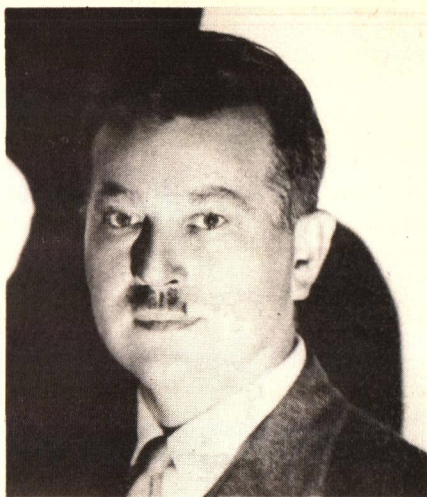

The Lithuanian immigrants to Chicago frequently made their habitats close to the Catholic churches, which gave them a certain moral and material support. The first waves of Lithuanian immigrants in America associated with already established Polish parishes. However, as the Lithuanian national consciousness became stronger and friction with the Poles increased, a large number of conflicts and disputes arose between Poles and Lithuanians who were members of the same parish. The main area of conflict centered around the question of whether Lithuanian or Polish would be the language of sermons and confessions.

These disputes became severe and even violent. The press of the day frequently reported these incidents in public newspapers. For example, in 1877 in Shenandoah, Pennsylvania, the Lithuanian church members barricaded themselves in the church and would not allow the Polish pastor to enter. In Freeland, Pennsylvania in 1894, a fight ensued between Lithuanian and Polish parishioners, in which the participants exchanged revolver shots, several persons were wounded, and the police had to intervene. As many of these Lithuanian immigrants moved west to Chicago, they were determined to establish their own parishes, independent of Polish influence.

Despite many handicaps, early Lithuanian immigrants did establish their own native-language parishes, newspapers, societies, businesses, taverns, and organizations, all of which contributed to the emergence of the ethnic Lithuanian in American society. Many of these early societies, which have long since disappeared, issued small token "chips" which were good for a purchase at the particular establishment. These tokens are a lasting memento of the early history of the Lithuanian immigrant to the city of Chicago. They are a reminder of the bond of national identity that caused people to band together in fraternal organizations as they adjusted to their new life in America.

The collection of Lithuanian American lodge tokens presented here was originally assembled by the late Dr. Alexander M. Račkus (1893-1965), himself an immigrant who came to Chicago. A member of the ANA, Račkus wrote several articles for *The Numismatist* in the 1920s and 1930s, and served as historical/numismatic curator of the Vytautas, the Great museum in Kaunas, Lithuania, 1936-1940. A listing of the Chicago lodge tokens appeared in the November, 1948 issue (No. 4) of the *American-Lithuanian Philatelic Specialist*, which Dr. Račkus published in Chicago after the war. However, the collection mysteriously disappeared over the years and was feared lost. In September of 1979 it was discovered in a small box behind some shelves in a closet, in the archives of the Balzekas Museum of Lithuanian Culture, 4012 Archer Avenue in Chicago. In the same box were also early Lithuanian lodge tokens from Philadelphia, Pennsylvania, and Brooklyn, New York. Since that discovery, the collection has been cataloged, photographed, and placed on permanent exhibit at the museum.

As the reader will discover, these small tokens display various inconsistencies, spelling errors, and poor grammar. Many of the spelling variances are due to the heavy Polish influence under which the Lithuanians tried to establish their own separate identity. Though the Lithuanian written language was being purged of Polish influences, that

1935 photo of Dr. Alexander M. Račkus (1893-1965) who originally assembled the collection catalogued here.

influence still shows up on many of these tokens. For example, the Lithuanian letter "š" which is "sh" in English, comes out as a Polish "sz" on the text of some of the tokens. The word "Lietuvos," meaning "Lithuanian," comes out as a Polish influenced "Lietuwiszku," or with other variances. In addition, in the Lithuanian language there is no letter "w," but the letter "v" is used. Yet the letter "w" shows up on numerous tokens. These are just a few of the many interesting "problems" which occur in these tokens.

The following is a catalog of Lithuanian lodge tokens of Chicago with historical notes on the societies that issued them.

1. SOCIETY OF SAINT GEORGE THE KNIGHT

Aluminum, 26 mm.

Obverse inscription: DR-TE SZV. IURGIO R. ir K. CHICAGO, ILL. with a dotted line border.

However, several of its members moved elsewhere, and the group disbanded.

In March of 1891 the society was revived, and in 1892 the first Lithuanian Roman Catholic

The society was formed for the purpose of saying confessions to the priests in the native Lithuanian language. With the money raised by the Saint Casimir Society, priests from other cities were paid to provide the Chicago Lithuanians with Easter services in their native language. One of these was Father Valentinas Čižauskas, who later became the pastor of the St. George's parish. St. Casimir's parish still exists today.

It still stands today, just west of the Dan Ryan Expressway, where it can be seen from the highway. Krušas later became the pastor of St. George's church, and was one of the highly respected church leaders in Chicago. In 1979 the Providence of God parish had the high honor of being visited by Pope John Paul II during his tour of America.

No. 19 bears a corded border, and the inscription is horizontal in relationship to the planchet. There are only 2 dots above the center ornamentation. No. 20 is very similar to No. 18, but several differences do occur. The position of the lettering is different: note the letter "I" in "society" is shifted to the left under the star. The border is crenated instead of being beaded. The die used for No. 20 is about 2mm smaller than No. 18.

Reverse description: GOOD FOR 5¢ IN TRADE.

Organized on January 22, 1899, in the Bridgeport section, this organization had a large library consisting of many thousands of Lithuanian books. It finally merged with another Lithuanian organization in 1928, after 29 years of fine cultural existence.

St. Roch's was named after Saint Roch, a Frenchman who cared for persons in plague-stricken Italy in the 14th century. The St. Roch fraternity was established in Lithuania in 1705 with the headquarters established in Varniai, Lithuania, in 1743. Its purpose was to nurse the sick and collect donations for the poor. The St. Roch's society in Varniai was forcibly closed by the Russian Czar in 1886. The Samogitian Lithuanians who came to the U.S. in the spirit of their original society, re-established it in Chicago.

The Our Lady of Vilnius church was founded on the West Side of Chicago after several years of preliminary meetings with the Catholic hierarchy to determine the need for a parish and school. In January of 1906 Archbishop Quigley authorized Rev. Casimir Ambrozaitis to establish the Lithuanian parish. In August of 1906 the parish purchased land at 2327 W. 23rd Place, between Western and Oakley Aves. On October 5, the ground was broken for a school, with the cornerstone being laid on November 11. In 1907 the church building was dedicated. The church was named after the famous Dawn Gate Shrine located in Vilnius, Lithuania.

Obverse inscription: BUTVILL TAVERN 3327 ARCHER AVE.

Reverse: GOOD FOR 10¢ IN TRADE.

This token was issued in 1938 by the tavern of Mr. Butvilas, and is a reflection of the population shift of the Lithuanians in Chicago towards other sections of the city.

29. WOMEN'S SOCIETY OF THE DAWN GATE

Bronze crenated, 25 x 30mm. 8 petals. The obverse has a dotted border; the reverse, beaded.

Obverse inscription: M.D.S.P.M.A.V.

Full meaning: Moteru Draugistė Szvento Panos Parijos Auszros Vartuose.

Translation: Women's Society of the Blessed Virgin Mary of the Dawn Gate.

This token was issued by the same parish that issued token No. 23. The Dawn Gate is a noted Catholic shrine in the capital city of Vilnius. The parish in Chicago was one of five in the U.S. named after this Lithuanian shrine.

This listing of Lithuanian lodges in Chicago is not exhaustive. Other tokens were issued by such organizations as: "The Lithuania Sons and Daughters Hall" on South Halsted, the "Lithuanian American Republican League," and others. These tokens frequently appear as "mavericks" in coin dealers' token boxes, and it takes a dedicated collector to know how to find them.

There were three other items that were minted by the World War I era immigrants which, although not tokens, should be mentioned here. The first is the medal issued as part of a ribbon in 1907 by the Women's Society of the Dawn Gate (as token No. 29).

Bronze with loop, 31mm.

Obverse inscription: STEBUKLINGA Š. P. VILNIAUS AUŠTROS VARTUSE.

Translation: Miraculous Blessed Virgin of Vilnius of the Dawn Gate.

The Lithuanian Congress held in Chicago, June 8-11, 1919, approved the gift of a cast bell from Lithuanian Americans to their fatherland. The 1200 pound bell, modeled after the Liberty Bell in Philadelphia, was paid for by donations from Lithuanian Americans and was shipped to Kaunas on January 12, 1922. It was rung for the first time on February 16, 1922, Lithuania's Independence Day. Those who contributed \$5 or more to the construction of the bell were eligible to acquire the Lithuanian Liberty Bell's Honor Badge, a bronze medal with ribbon and pin-back bronze bar. The striped ribbon is yellow, green and red, the three colors of the Lithuanian flag and the bell depicts Vytautas mounted on a charging steed.

The year 1930 marked the 500th anniversary of the death of Lithuania's greatest patriarch, Vytautas the Great. Under Vytautas, Lithuania stretched from the Baltic to the Black Sea in the early 15th century. It was Vytautas who defeated the Teutonic Knights at the famous Battle of Tannenberg (Žalgiris) in the year 1410. In Lithuania in 1930, a year-long celebration was held, commemorating the anniversary of Vytautas' death.

The Lithuanians in Chicago issued a special medal/badge to commemorate the event. Struck in both bronze and in aluminum, each bore a cloth ribbon-pin bearing the colors of the Lithuanian national flag: yellow, green, and red.

In 1979 a hoard of these medals surfaced at the Balzekas Museum in Chicago, and the majority of them were subsequently sold to Lithuanian numismatists. The bronze version of this medal is much scarcer than the aluminum.

FRANK PASSIC was born in 1953 in Albion, Michigan, and attended Albion Public Schools, graduating in 1971. He received his Bachelor of Arts degree in 1975 from Spring Arbor College where he majored in the Social Sciences.

An ardent numismatist, Passic has been a member of the Albion Coin Club since 1964 and presently serves as the club's general chairman for their annual coin show. He also serves on the board of governors of the Michigan State Numismatic Society. In addition, he holds membership in the Albion Coin Club, Michigan State Numismatic Society, American Numismatic Association, International Bank Note Society, and the Central States Numismatic Society.

Passic is co-founder of the Lithuanian Numismatic Association and editor of its

publication, *The Knight*. He has written numerous articles that have appeared in such publications as *The Numismatist*, *World Coin News*, *Coin World*, *IBNS Journal* and others. Since 1979 he has served as numismatic curator for the Balzekas Museum of Lithuanian Culture in Chicago.

This collection of tokens has a special personal significance for the author. As he explains it, "My grandparents came over to America in 1913 from Lithuania and went to Chicago during the era these tokens were issued. My grandfather worked in the steel mills there and lived on S. Halsted, in the Bridgeport section. In 1918 he moved to Albion, Michigan. You can imagine my surprise when I came across a token of the Providence of God Society, the place where my grandparents were married by Father M. Krusas in January of 1914!"

Better late than never," so the saying goes—and if the U.S. Treasury subscribes to that philosophy, Americans could get a stunning new commemorative coin next year, marking the 250th anniversary of George Washington's birth. And rather than preparing a new design, the Treasury Department could commemorate the event by selecting a design prepared fifty years ago by noted sculptress Laura Gardin Fraser, the wife of James Earle Fraser, the sculptor who designed the Buffalo nickel. A first-rate sculptor and medalist in her own right, she designed a number of U.S. commemorative coins—notably the Oregon Trail half dollar. She also designed the official national medal for the Washington bicentennial 50 years ago. The decision to select Mrs. Fraser's design would not only provide the United States with an outstanding commemorative, but would also rectify a fifty year old injustice by giving Mrs. Fraser's work the national recognition it should have been accorded all along.

In 1931, the Treasury held an open design competition for the Washington quarter, then being planned for issuance the following year. Of more than 100 entries, one by Mrs. Fraser was judged to be the winner. Treasury Secretary Andrew W. Mellon dissented from the verdict, however, preferring a design by sculptor John Flanagan. Largely through Mellon's influence, Flanagan's work was chosen for use on the coin.

The upcoming anniversary of Washington's birth has prompted at least one congressman to call for a commemorative coin. The choice of Mrs. Fraser's design would be advantageous for a number of reasons, not least among which is practicality—such a choice would benefit the Treasury by saving the expense of preparing a new design. Historically such a decision would tie the new observance to the one of fifty years ago, finally making use of a design that was long ago popularly approved and accepted.

The Proposed *Is the Time Finally*

Significant precedent has been set for marking next year's anniversary with some sort of special coinage tribute. In 1959, the Treasury redesigned the reverse of the Lincoln cent for the 150th anniversary of Abraham Lincoln's birth. That year was also the 50th anniversary of the Lincoln cent, the very same milestone the Washington quarter is approaching.

Representative Doug Barnard, Jr., a Georgia Democrat, has introduced a bill in the House of Representatives calling for issuance of a commemorative half dollar to mark next year's Washington anniversary. According to an aide, Barnard has proposed that the coin be minted in 90 percent silver and has suggested that the Mint strike 10 million pieces for sale to the general public at a premium. The bill makes no provision for a circulating counterpart coin.

Barnard's proposal would have to be approved by Congress. The Treasury, however, could get a new Washington coin without any special legislation simply by revising the quarter. The present design has been in use nearly twice as long as the statutory minimum of 25 years, so congressional

authorization would not be required for a change.

A similar move was made in 1959 when the Treasury held an in-house competition for a new design of the Lincoln cent reverse, and an entry by Frank Gasparro was selected. Gasparro, then a staff engraver, later became the Mint's chief sculptor-engraver.

In choosing Mrs. Fraser's design, the judges in the 1931 competition, members of the Commission of Fine Arts, pronounced it to be "easily the best" of the many entries. Students of coinage art have echoed that praise ever since. Dr. Cornelius Vermeule, author of *Numismatic Art in America*, considers it "one of the most spectacular designs ever prepared for a U.S. coin, and says its use next year would be "perfect."

"Artistically, it's stunning," Vermeule exclaims. "Historically, it's identified with the Washington bicentennial, and yet it's very modern. And technically, it's flawless; there's just no way to get all the required elements on the quarter and do it any better than Mrs. Fraser."

The Fraser design bears a firm-jawed,

right-facing bust of Washington and a powerful eagle with overlapping planes of rough feathers. Flanagan's work, by contrast, was criticized by the judges as being "unacceptable" and failing to meet "the standard of design which should characterize the coinage of the United States."

There is no apparent reason why the Fraser design could not be used, either on the quarter or on a half dollar, if that is the direction the coinage tribute takes. A number of technical questions would have to be answered first, but these seem to pose no insuperable problem. The Treasury would have to determine, for example, who owns the rights to the design. Presumably these belong to the heirs of Mrs. Fraser, who passed away in 1966. There also is uncertainty regarding the whereabouts of the artist's plaster models. If these could not be found, production of such a coin would become more difficult, though not, by any means, impossible.

Dr. Alan J. Goldman, acting director of the Mint, acknowledged in a recent interview that issuance of a coin or perhaps a national medal would be justified for next year's anniversary. At the same time, however, Goldman

"Artistically, it's stunning . . . And technically, it's flawless; there's just no way to get all the required elements on the quarter and do it any better than Mrs. Fraser."

DR. CORNELIUS VERMEULE

remarked that the Mint is producing a Washington commemorative even now, practically every day, by making the current quarter.

The Mint would rather issue a special half dollar than change the design of the quarter. As Goldman points out, the half dollar sees only limited circulation, so hoarding of such a coin would cause little or no concern, assuming, of course, that the plans were to include a non-silver coin for circulation.

Quarters, on the other hand, are vital to commerce, so hoarding of these could lead to a major disruption in the nation's money flow. Mint officials fear such hoarding might occur if a special new design were used there.

Congressman Barnard also would prefer a special half dollar. According to his aide, Barnard considers the Washington coin a major opening wedge in a bid to revive commemorative coins as an ongoing

series, and envisions that the series will be issued in the half dollar denomination.

Barnard's bill does not spell out the design of the coin it would authorize, leaving this detail to the Mint's discretion. David John, a legislative aide to Barnard, points out that members of Congress could signify their preference for the Fraser design at hearings on the measure. Hobbyists and other members of the public can, and should, make their wishes known on the matter, John points out, by writing to their congressmen and the Treasury.

NUMISMATIC NOSTALGIA

q. david bowers

"Of all the words of tongue or pen, the saddest are these: It might have been"—goes the old saying. "What might have been" but wasn't is generally the story of United States coin design.

Throughout American history many designs were conceived, executed in metal, and produced only in limited form. For example, we have Barber's "Amazonian" silver coins of 1872—the dime, quarter, and half dollars of 1877, coins of elegant character and appearance.

When George T. Morgan produced the silver dollar design bearing his name in 1878, it was criticized almost universally by the numismatic and public press alike. The eagle was unnatural, gothic letters should not have been used on part of the reverse when letters of other styles were used elsewhere, the head of Liberty was without character, and so on. Feeling these criticisms very strongly, Morgan endeavored to produce a replacement design. Among his efforts were several dollars of unusual beauty, including the 1879 "schoolgirl" and the 1882 "shield earring" pieces. Unfortunately for numismatists, these coins were issued only in pattern form and to the extent of just a few dozen coins.

In 1892 the dimes, quarters and half dollars designed by Charles Barber made their appearance in circulation. Notwithstanding what collectors might think of them today, at the time they were universally unpopular with numismatists. It was contended that these pieces were mere tokens, devoid of artistic merit.

In 1895 *The Numismatist* noted that the National Sculpture Society, acting in unison with the American Numismatic Society, was going to have an exhibition at the Fine Arts Building on 57th Street, New York City, "at which designs for a new goddess of Liberty will be shown and for which two prizes of \$300 and \$200 will be given." The arti-

cle went on to say that: "All the sculptors and artists in the United States have severely criticized the existing coinage. The designs of European coins, they declare, are infinitely superior. The French coins are probably the most artistic of any, although the St. George and Dragon of the British sovereign is undoubtedly a very handsome and artistic design. The first impression which the head of Liberty on the silver dollar gives, so say the sculptors, is that of weakness and indecision. This is not befitting a powerful, progressive nation like the United States. Sculptors also criticize the pose of the eagle . . ."

As a result of this competition, a number of beautiful designs were submitted. However, nothing ever came of the situation or of the many complaints, and the coinage designs for circulation remained unchanged.

A year or so ago I acquired from a book dealer an interesting pamphlet entitled "A New Series of Designs for the Gold, Silver and Subsidiary Coins of the United States of America." Written by M.W. Hanchett, and printed in 1898, the brochure gave one man's idea of what the new coinage should look like.

Sometime, probably more than twenty years ago, R.H. Williamson prepared an analysis of the Hanchett proposal for Charles W. Foster, who was popularly known as "the suitcase dealer" and who lived in Upstate New York. A copy of this Williamson manuscript, which apparently never saw publication, accompanied the brochure when I obtained it. With full credit to the long-ago efforts of Mr. Williamson, his comments are given herewith, following a reproduction of the Hanchett pamphlet.

A NEW SERIES OF DESIGNS
... FOR THE ...
Gold, Silver and Subsidiary Coins,
... OF THE ...
UNITED STATES OF AMERICA
WITH DESCRIPTIVE NOTES.

By M. W. Hanchett,

The increasing prominence of our republic in its standing among the nations of the world and our more intimate communication with people of all climes suggests the importance that in every way possible, not only for the world at large but for our own people as well, our national characteristics should be appropriately represented. To this end the opening of the new century seems an opportune time when the designs of our national coinage might well be revised and systematized and made more significant of our republican government. The commonly used figure of a human head—copied from royal busts upon coins of monarchical governments—seems without special appropriateness to this republic while the significance of the stars and the eagle is widely appreciated, they being the recognized emblems of our nation.

A suggestion for a new series of designs is appended made in conformity to a general plan and utilizing the emblems universally associated with the republic—the Star and the Eagle. The special points recommending the series are:—

I. The spread of the eagle's wings is varied in relative proportion to the value of the coins; the greater the value the greater the stretch of wing.

II. The head of the eagle on gold coins looks toward the right, on silver coins toward the left. This is of advantage in the general handling of coins and will be appreciated especially by the blind or those of impaired sight as an aid in determining the value of coins.

III. The stars of the larger coins are arranged on the general outline of a single star representing the unity of states as expressed in our adopted legend—"E. Pluribus Unum." It is proposed that these coins shall carry one star for each state of the union, the number to be changed as new states are admitted, the same as is done on the official flag of the country.

Designs for Coins of Gold.

IV. Upon the double eagle as the coin of greatest value and of largest foreign use, two flags are placed, indicating the nation's authority and power exercised in two hemispheres.

V. In Proverbs, Chapter XXX, Verse 5, we read: "He is a shield unto them that put their trust in Him." The verse suggests the appropriateness of placing the motto "Our trust is in God" on the shield.

**THE U.S. COINAGE DESIGN PROPOSAL
OF 1898
MADE BY M.W. HANCHETT
OF SYRACUSE, NEW YORK.**

by R.H. Williamson for Charles W. Foster
850 East Lake Road, Rushville.

William Jennings Bryan's campaign for the free coinage of silver at a 16 to weight ratio with respect to gold, was one facet of the

great political controversy which centered about our coinage near the turn of the last century. Every political party and aspirant for public office took a stand on the subject, thereby often revealing an abysmal ignorance of the economic facts of life or betraying subservience to commercial pressures such as the silver-mining interests.

A great number of books and tracts appeared, purporting to be texts or references

on money and banking, history of U.S. Coinage and the like. Nearly all these, upon perusal today, turn out to be partisan propaganda for the political football of the silver problem. The result of all this attention was widespread thought by citizens everywhere about the problems of coinage.

A byproduct of such study, and a welcome relief from the political aspects of the silver issue, is this little folder prepared by Milton Waldo Hanchett of Syracuse, N.Y., in 1898. This publication contains graphic proposals for new designs of gold, silver and minor coins, embodying several novel ideas. The most interesting was the idea that "the spread of the eagle's wings is varied in relative proportion to the value of the coins; the greater the value, the greater the stretch of wing."

Hanchett came from early colonial stock. The progenitor of the family in America was "Deacon Thomas" Hanchett who had sailed from Plymouth, England, on the good ship "Mary and John" and landed at Nantusket near Boston on May 30, 1630. The family home was in Suffield, Connecticut, for many generations. Deacon Thomas Hanchett's great-great-grandson Oliver Hanchett (1741-1818) was a Captain in the Revolutionary War. His son Dr. John Wilkes Hanchett 1774-1844 moved "West" from Connecticut in 1822 to the Onondaga Valley near Syracuse. The Doctor's son Milton Waldo Hanchett (1822-1904) was born July 12 of the same year.

Among Milton Waldo Hanchett's earliest recollections was seeing Lafayette, who visited Syracuse in 1824. The Hanchett family moved to the "city" of Syracuse in 1826 when it had a population of about 800. The salt business was beginning to grow and also Syracuse seemed destined to become an important port on the Erie Canal, completed the year before. Another of Hanchett's early recollections was the arrival of the first railway train in the city, only a few years after the canal was finished.

Hanchett lived most of his life in Syracuse, although he worked at the drug-store business at Troy, New York, and at New York City, 1840-45; in the latter year he returned to Syracuse and studied dentistry. He married Anna Huntington of Owego, New York, in 1848, and bought the Syracuse lot at 311 West Onondaga St., Syracuse, where they later built the home in which they lived all of their later lives. He practiced dentistry in Hartford, Connecticut 1850-1855, but then returned to Syracuse where he engaged in the fire insurance business until his retirement

40 years later. He was a director of the New York State Banking Co., 103 East Water St., from its founding in 1872 for about 30 years and was Vice President for most of that period. He also engaged in the manufacture of a dentifrice for many years.

His career was an extremely active one. Among many activities, he was twice president of the YNCA [sic]; he was a music lover and a musician; he was the organist at St. Paul's Episcopal Church, Syracuse, for nine years; he made architectural plans for the Plymouth Congregational Church, Syracuse, including two major enlargement programs; he made sketches from memory for the Historical Society to show the location and design of some of Syracuse's earliest buildings; he was known as a deep student and a rare conversationalist.

Hanchett was an inventor, having patented an improved dental chair and also the sostenuto or tone-sustaining pedal used on pianos.

His wife died in 1890. One of his daughters died in infancy and another in 1893. His son, Dr. Henry G.H. Hanchett was a music instructor in New York City for many years.

Hanchett's interest in coinage designs, resulting in his folder of 1898, came at a time when he was 76 years of age, in comparative retirement, and free from family cares. It was undoubtedly inspired by his many years of banking experience and by his religious convictions as well as by the contemporary furor about the silver issue. The religious aspect is revealed by Hanchett's proposal that the motto "Our trust is in God" be placed on the shield, based on the following Biblical quotation from Proverbs 30:5 "He is a shield unto them that put their trust in him."

His folder does not seem to have created much of a stir, since no reference to it has been discovered in contemporary Syracuse newspapers or in numismatic literature. This solitary reference appeared in a Syracuse paper in 1904 at the time of his death;

"He also made and copyrighted original designs for the coinage of the country, which however have never been adopted".

No pattern coins similar to the proposed designs are known, although his use of the star is reminiscent of the star on the gold Stella patterns dated 1879 and 1880. Further research would undoubtedly uncover correspondence on the subject with the Treasury Department, Bureau of the Mint, or with New York Congressmen.

Thus we have reported another chapter among the many proposals for improving our coinage.

THE ROMAN COIN PROJECT

dauid r cervin

Originated and administered by David R. Cervin, the Roman Coin Project is a program specially designed for junior members of the ANA to earn Roman and Byzantine coins for their activities in numismatics. Up to eight coins can be earned, four Roman coins in the initial program, and four Byzantine coins in the advanced section.

In the initial program, the first three coins can be earned from numismatic participation in three of six categories: educational presentations, exhibiting, writing, club office, show committee chairmanship, or receiving a badge in numismatics from your youth group. The fourth coin must be earned by completing the ANA's Young Numismatists Correspondence Course. In the advanced program, coin number five is earned by signing up a new ANA member, coin number six by signing up two additional members, coin number seven for the publication of at least 500 words in a major numismatic publication, and coin number eight for planning and executing an exhibit of the coins earned thus far in the program.

For further information or a Roman Coin Request Form write David R. Cervin, 6201 Adirondack, Amarillo, TX 79106.

It pays to advertise! In the December issue of *The Numismatist*, The Roman Coin Project column included a request for a young numismatist to edit a regular feature for juniors in the *Centinel*, the quarterly journal of the Central States Numismatic Society. The request came from Kevin Foley of Milwaukee, Wisconsin, newly appointed editor of the journal.

The ink was hardly dry on *The Numismatist* when the announcement was spotted by Shawn Duthie, 6890 North Montana, Helena, Montana 59601. Shawn not only immediately applied for the position, but was accepted by Mr. Foley and his appointment was confirmed before Christmas! What a nice Christmas present, not only for Shawn, but for all juniors and numismatics in general. Yes, numismatics gains from this sequence of events. The potential for advancing the hobby of numismatics is at a maximum among juniors. And, with the backing of the prestigious Central States Numismatic Society, there is no limit as to what can be accomplished.

How is a good numismatic column for juniors run? Well, one person can't really do it alone. The junior editor needs the help of other juniors. And who are these other juniors? You! Yes, all of you juniors can help Shawn produce a fine column for the *Centinel* by submitting information for publication in the quarterly journal. What do you write about? Tell what juniors are doing at your club meetings, how they partici-

pate in helping at coin shows, what efforts are being done by adults to promote junior activities, and about juniors who promote numismatics among boy/girl scouts and at junior and senior high schools.

Do you like or not like the new coins that are being minted? Maybe you would like to see commemorative coins again minted, possibly depicting an important historical event in your state or region. What about the junior exhibits at your club, region, or state shows? Describe some of these collections. By the way, exhibits don't have to be exhibited only at coin shows. They can sometimes do more good by being shown at a library, bank, or school. Topics for short articles are almost without limit.

What benefit do you gain in participating in the youth program of the *Centinel*? First, it is very satisfying to see one's literary efforts in print. Second, you can earn up to two coins (one Roman and one Byzantine) in the RCP for this effort. Third, you are contributing to and helping the world of numismatics.

Yes, be a doer, be a helper, get on the bandwagon with Shawn in making the junior feature of the *Centinel* the best program available for juniors.

EXONUMIA NOTEBOOK

David Schenkman and Joseph Levine

The J.D.M. Counterstamp

During the nineteenth century a great number of U.S. and foreign coins were counterstamped in this country by merchants and individuals for advertising and various other purposes. Most of these coins were stamped with merely a set of initials or a name. Far more desirable from a collector's standpoint are those few coins counterstamped with a business name and address. These pieces are identifiable as legitimate "merchant counterstamps" and are avidly sought by collectors of early merchant tokens.

Rarely is a coin encountered which includes, as part of its counterstamp, some sort of a design. The illustrated U.S. half cent is an interesting exception to the rule; it has, in addition to the initials J.D.M., a paddlewheel steamboat. An even more unusual feature of this piece is the method of counterstamping. It was struck with a die similar in style to those used to strike

coins. Thus the initials and design are raised, rather than incused, on the host coin.

F.G. Duffield, a former editor of *The Numismatist*, has published in serial form between 1919 and 1922 "A Trial List of the Countermarked Modern Coins of the World." The J.D.M. counterstamp is

listed as number 1438. Although Duffield did not comment on the piece, it has been attributed by others to Baltimore, no doubt because several examples have been found there over the years.

The Duffield specimen was counterstamped on an 1828 half cent. Kenneth Hallenbeck, in his article "Counterstamped U.S. Half Cents," published in the 1967 volume of *The Numismatist*, lists a specimen stamped on an 1811 half cent. In my collection there are two examples—one on an 1828 half cent and the other with no date visible.

Among my reference books on ships is one entitled *Merchant Steam Vessels of the United States 1790-1868*. Compiled by William M. Lytle and Forrest R. Holdcamper from various government records, it lists every steam vessel registered or licensed in this country up to 1868. Only two steamers with the initials J.D.M. are recorded in this book. One of them, the JULIUS D. MOR-TON, was a sidewheel steamer of 472 tons. Built in 1848 at Monroe, Michi-

gan, its home port was Detroit. The ship was destroyed by fire in 1863.

The other steamer listed was the JOHN DAVID MONGIN, a side-wheeler of 169 tons. It was built in New York City and operated out of Savannah, Georgia. This vessel was abandoned or dismantled in 1836.

Based on the data in the Lytle-Holdcamper list, it is logical to attribute the J.D.M. counterstamp to the steamer JOHN DAVID MONGIN and include it with the early merchant tokens of Savannah, Georgia. The period during which this vessel operated ties in with the dates on the counterstamped coins, and the other steamer with the initials J.D.M. was from a later period.

Why were the coins counterstamped? Since all specimens seen were stamped on half cents, they probably had a specific use other than advertising. Perhaps they were given to customers at the company's ticket office when fares were purchased, and collected when the vessel was boarded.—D.E.S.

Indian Trade Tokens The Token of Hiatt and Company Store

by Harley W. Rhodehamel

The rare Hiatt and Company Store token, known only in a single denomination, was recently identified by Sam Rabinowich as an Indian trade token for use in exchange at Hiatt's store at the Osage Agency in what was later named Pawhuska, Indian Territory.¹ The token was probably in use from as early as 1873 until 1881 or somewhat later. It is identified and pictured in Melvin Fuld's series *Seldom Seen Tokens* (TAMS, February, 1971, vol. 11, p. 27), but the description does not indicate where or how the token was used. The author is aware of only two and perhaps three Hiatt tokens: his own, and the one that was pictured in *Seldom Seen Tokens*, which may or may not be the same one that was sold at auction in February, 1971.²

In January 1873, Hiatt's store was the second business to be licensed to trade at the Osage Agency;³ the company of Dunlop and Florer had received a license in September, 1872. The two trading houses flanked each other and apparently were keen competitors.

Several licenses to trade with the

Indians were registered to John Milton Hiatt.⁴ In July 1870, he was first licensed to trade with the Osage and other tribes. Listed as one of his employees in that license was Robert W. Dunlop who later left Hiatt's store to join the partnership of Dunlop and Florer, Hiatt's competitors in Pawhuska. In 1871, a

license was issued to Hiatt and Company rather than to J.M. Hiatt. In both 1876 and 1877, Hiatt and Company was licensed to trade with Osage and the Kansas, or Kaw Indians, who had shortly before been granted rights to settle within the limits of the Osage Indian Reservation.

The last trade license issued to Hiatt was dated 1881. Hiatt would have been a man of 57 in that year, not old but perhaps ready to retire. No information is available about Hiatt's store after 1881. However, in 1886, as the only surviving partner of Hiatt and Company, he was awarded a claim by the U.S. Government for goods sold earlier to the Osage on credit.⁵

Genealogical records reveal that John Milton Hiatt was born in 1824 in Milton, Wayne County, Indiana.⁶ He moved his wife and his only child, a daughter, to Kansas, then on to the Indian Territory where he opened his trading post. Records indicate that between the time he left Indiana and opened the trading post in the Indian Territory, he ran a sawmill in Keokuk, Iowa. This is of interest because at approximately the same time C.K. Peck of Durfee and Peck, an Indian trading company, also owned and operated a hardware store in Keokuk.⁷ Fuld's description in *Seldom Seen Tokens*

points out that the Hiatt and Company store token and the Durfee and Peck token are in some ways quite similar. Since the Durfee and Peck token is known to have been made by the Scovill Manufacturing Company,⁸ it is quite possible that the Hiatt token was also.

Such coincidences lead to the question of whether or not Peck and Hiatt knew each other in Keokuk, and, if so, did they discuss Indian trading and tokens? Lack of information leaves these questions entirely to speculation. The two or three known Hiatt and Company Store tokens are among the few historic records that document J.J. Hiatt's trade with the Indians.

EGYPT

UNICEF/IYC Silver Proof Coin to be Issued

Representatives for the Egyptian government, Paramount Coin Corporation, and UNICEF sign the official contract authorizing a special commemorative proof coin for the International Year of the Child Coin Programme.

The Arab Republic of Egypt will issue a special silver proof commemorative coin as part of the UNICEF-International Year of the Child Coin Programme. This announcement was made by H.E. Mr. El Sayed Kamel El Gebali, Under Secretary of State for the Ministry of Finance and Chairman of the Egyptian Mint.

The official contract was finalized and signed at the Egyptian Mint on January 28, 1981. The document was executed on behalf of Egypt by El Sayed Kamel El Gebali, while Gerald M. Fletcher represented Paramount Coin Corporation, numismatic advisor for the coin programme. The ceremony was also attended by Ulf Kreuger, UNICEF Representative for Egypt.

The new silver coin will be struck in proof only for the collection. In addition

to the proof coin a companion piéfort will be issued. The five pound coin will measure 36mm and weigh 300 grains. The piéfort, which is struck on a double thick blank, will weigh 600 grains. Both coins will be struck in .925 fine silver. A maximum of 20,000 proof silver coins will be minted and no more than 2500 piéforts will be struck.

All of the coins in the UNICEF/IYC Programme illustrate the series theme "Children." In keeping with this guideline, the reverse design of the Egyptian coin features three happy children joining hands and dancing around a globe. Depicted on the globe are the logos of UNICEF and IYC in addition to the inscription "IYC." Indicating the importance of education in Egypt, the globe features a textbook, the Arabic letters for "A" and "B" and the

Arabic number "3" to show the learning tools of reading, writing and mathematics.

The remaining symbols on the globe depict the advances in other areas of Egyptian life. A rocket illustrates modern Egypt, a television indicates progress and industry, and a flower signifies advances in agriculture. Beneath the central device is the English inscription "International Year of the Child."

The obverse design features the Arabic inscription for five pounds in a central circle with the Arabic phrase "Arab Republic of Egypt" above. Flanking the circle are the Arabic inscriptions for the years 1981 and 1401 which correspond to both the Christian and Hegira calendars. Ordering information is available from F.L. Kellogg, Suite 410, 866 United Nations Plaza, New York, NY 10017.

POLAND

Pattern Coin Commemorates Sailing Vessel Dar Pomorza

The National Bank of Poland has announced that as of March 20, 1981, it is offering for sale a silver pattern (*proba*) coin featuring the sailing vessel *Dar Pomorza*. Together with a 20 zloty cupronickel coin put into circulation on August 4, 1980, the silver coin commemorates the ship's 50 years of service under the Polish flag.

Dar Pomorza was built in Hamburg in 1909 as a training ship with accommodations for 150 students. After World War I, France came into possession of the ship until 1930 when it was bought by the Polish Pomorze community for the Marine School in Gdynia. From 1931 to 1958 it made a number of training voyages, including one around the world from September 1934 to September 1935.

During World War II the ship was interned in Sweden, returning to Poland on October 24, 1945. The vessel made numerous voyages to the Atlantic Ocean, the Mediterranean and Black Seas. In 1972 *Dar Pomorza* won the pre-Olympics regatta and a special

award in the 1980 "Operation Sail" race in Holland.

The 100 zloty commemorative pattern coin, designed by W. Czerwosz, is 32mm in diameter and weighs 16.5 grams. The limited edition of 4,000 plain edge proof coins was struck in .625 fine silver. The coins are available for sale from Pekao Trading Corporation, 225 Park Ave. South, New York, NY 10003.

UNITED STATES

Orders Now Being Accepted for 1981 Proof Sets

The United States Mint began accepting orders for the 1981 regular Proof coin sets, April 1, at the San Francisco Old Mint. The 1981 sets are priced at \$11 each, which includes handling and shipment by first class registered mail.

The Mint reserves the right to cancel

orders which exceed production capacity. The proof coins are sold only in sets with a limit of five sets to each customer. In the event that orders exceed production capacity, an order may be reduced to ensure a more equitable distribution to as many customers as possible. If a remittance is deposited and an order cannot be honored, or if the number of sets ordered is reduced, a refund will be made to the customer. Orders are not cancelable by the customer.

Proof coins bear the "S" Mint mark and are produced only at the San Francisco Assay Office. All aspects of production, from dies to blanks to the striking and handling of the proof coins, are specially designed to provide the ultimate in quality. Special dies and blanks are used and each coin is struck twice. This results in a coin with a

frosted portrait on a mirror-like background. Proof coins are then removed from the press by hand to avoid scratches and abrasions. A Proof coin set contains a cupro-nickel clad dollar, half dollar, quarter dollar, dime and the five and one cent pieces. The coins are sealed in a package which protects and displays the sets.

The Mint will begin to mail the sets in June and all orders will be mailed by the end of December. With the exception of those orders which are the first to be mailed, acknowledgment cards will be sent to customers indicating the date they may expect their orders to be mailed from San Francisco. Orders and remittances by personal check, money order or cashier's check should be sent to Bureau of the Mint, 55 Mint St., San Francisco, CA 94175.

Union of Plate Printers, Die Stampers, and Engravers Issues Souvenir Card

Bureau of Engraving and Printing craftsmen have announced that a souvenir card will be issued in conjunction with the 79th International Convention of the International Plate Printers, Die Stampers and Engravers Union of North America. The convention is scheduled to be held in Washington, D.C. during the week of May 17-23, and will be hosted by the BEP locals.

The souvenir card was designed, engraved and printed by former and present BEP employees. The card features an engraving of the face of a proposed \$2 Treasury Note that was probably intended to be part of a new type of legal tender issue. The engraving is unusual in that the entire surface of the face of the note is covered by the design. The theory behind this design approach was to foil counterfeiters by creating multiple details and line engraving techniques that would be difficult to duplicate. The note featured on the souvenir card is one of the first and best examples of this type of engraving produced at the BEP.

The 8½ x 11-inch card is entitled "International Plate Printers, Die Stampers and Engravers Union of North America." It was printed from a single-subject plate on a hand fed flat-bed intaglio press by retired Bureau printers.

5,000 souvenir cards have been printed for the upcoming 79th International Convention in an effort to satisfy both craft members and collectors interests and demand. Cards are available by mail, with a limit of five per customer at \$8 per card, plus \$1 per order to cover the cost of mailing. Mail sales will be discontinued on May 15, 1981, or upon depletion of stock, whichever occurs first. The proper remittance in the form of a money order made payable to Washington Plate Printers Union should be addressed to P.O. Box 23796, L'Enfant Plaza Station, Washington, D.C. 20024. Personal checks or cash will not be accepted. Orders should be made on letter-size paper. The purchaser's name, address and zip code should appear on both the letter-size order and on the transmittal envelope. If available, a return address label enclosed with the order will facilitate handling. Customers are asked to allow 30 days for delivery.

California Bank Issues Hostage Medal

Barbara Hyde, who created the ANA Hawaii 1981 Midyear Convention medal, has sculpted a medal under the sponsorship of American Savings in California which pays tribute to the 52 Americans recently released from captivity in Iran.

Patterned after the Peace Dollar, the obverse of the medal shows a blind-folded Liberty, with the traditional inscription *IN GOD WE TRUST*, surrounded by the legend *HOSTAGE* above the portrait bust and *IRAN* below. The reverse bears the motto *A TRIBUTE TO THE UNITED STATES CITIZENS TAKEN HOSTAGE BY THE IRANIAN GOVERNMENT ON NOV. 4, 1979*.

The medals are available at \$15.50 at all California branches of American Savings and Loan Association. All net proceeds from the sale will be placed in a trust fund for the American Red Cross, the organization that monitored the health and well-being of the hostages throughout their confinement and also provided assistance to their families. Further information for ordering the medals can be obtained by writing to S.M. Jayich, 9465 Wilshire Blvd., Beverly Hills, CA 90212.

MACAU

New Issues Commemorate Year of Cockerel

The Government of Macau has announced the issuance of legal tender gold and silver coinage to commemorate the Year of the Cockerel. The fourth in a series of issues commemorating the Chinese Lunar Year, this year's coin features the cockerel, regarded by the Chinese as a highly virtuous animal symbolizing five favorable characteristics: culture, represented by the cockerel's crown-like comb; strength, represented by the spurs on its feet; bravery, since it never retreats from the enemy; love, as it will share its food; and faith, because it will always protect.

Available in proof and bright uncirculated issues, a total of 3,500 gold coins and 2,000 sterling silver coins have been authorized. Each 22 kt. gold coin weighs 15.98 grams and measures 28.4mm in

diameter. The silver issues, struck in .925 fine silver, are 38.6mm in diameter. The coins have been struck by the Pobjoy Mint of England in association with the Phillips Mint of the United States. Further information about the special issues, including ordering instructions, is available from Year of the Cockerel, c/o Instituto Emissor de Macau, P.O. Box 494, Macau; or Phillips Mint, 250 Kawaihae, Suite 8-A, Honolulu, HI 98625.

Rochester Numismatic Association (LC-8)

Approximately 90 members and friends gathered to honor Beatrice May Weaver, 68th President of the Rochester Numismatic Association, at a banquet held Saturday, March 14th at the Party House in Rochester, New York. Each year at the club's annual banquet, the RNA honors the preceding year's president by issuing to each member a 2 inch bronze medal bearing the portrait of the honoree on the obverse and the club seal on the reverse.

These medals are considered by the organization's members and other numismatists to be a rather unique tradition among coin clubs. Alphonse Kolb, RNA President in 1930, has executed all obverse dies from 1921 through 1978. However, Alphonse's reverse die was used on the Weaver medal, while the obverse was the work of Achille Forgione. The medals, struck by Metal Arts in Rochester, were issued in bronze, .999 fine silver, and one in 14kt. gold. A few of the bronze medals are still available at \$7 each (including postage), and can be ordered by writing Steve Tanenbaum at P.O. Box 9324, Midtown Plaza Station, Rochester, NY 14604.

The Rochester Numismatic Association meets regularly on the 2nd and 4th Tuesdays at the Planetarium, 657 East Avenue in Rochester. Guests are always welcomed.

ELECTION '81

Nominations Report

In answer to President George Hatie's call for nominations, published in the January issue of *The Numismatist* (page 63), the following are either incumbents who have declared their candidacy for a specific seat, and or candidates who were nominated as of April 5, 1981, for ANA offices for the 1981—1983 term.

Further nominations may have been made by any member in good standing, including affiliated clubs, prior to April 15, 1981, subject to current bylaws as published in the January 1981 issue. The final nominations report will be published in the June edition of *The Numismatist*.

Nominations had to be submitted in writing to the executive vice president. They were acknowledged, and the nominees were notified upon securing the necessary number of nominations from member clubs in good standing and at least five nominations from individual members in good standing. Club nominations had to bear the signatures and addresses of at least two officers of the nominating club. No member could nominate himself nor nominate a number of candidates for any offices in excess of the number to be elected thereto.

Election will be by mail ballot only, and ballots and biographic sketches of the candidates will be mailed to each member entitled to vote by June 11, 1981. Each candidate's biographic sketch and platform will also be published in the June issue of *The Numismatist*. Mail ballot envelopes must be postmarked prior to June 26, 1981, for the ballot therein to be counted.

CONVENTIONS

Summary of 1981 Hawaii Midyear Convention Board Meeting

Although the 1909 and 1923 conventions of ANA were held in Canada, the board of governors did not meet during conventions in those early years so the board meeting held at the 1981 midyear convention in Honolulu was the first ever held outside Continental United States. The meeting was in three sessions and all governors except Q. David Bowers were present for all actions unless otherwise noted herein.

In attendance were President George D. Hatic; Vice President Adna G. Wilde Jr.; Governors Harry X Boosel, Grover C. Criswell, Geneva Karlson, Kurt R. Krueger, Charles O'Donnell and Florence Schook; Treasurer William C. Henderson; Legal Counsel Richard B. Dusterberg; Executive Vice President Edward C. Rochette; Assistants to the Executive Vice President Ruthann Brettell and Kenneth L. Hallenbeck; and Public Relations Director Glenn B. Smedley. The action on each motion during the meeting was considered to be unanimous when the eight board members present voted for or against it; this in view of the fact that Governor Q. David Bowers did not attend the convention.

Disciplinary Actions

Formal complaints were heard and action taken in accordance with provisions of the bylaws, with the following results.

Robert C. Anderson, LM 524, dba RCA Coin Exchange, Floral Park, N.Y., was suspended from membership for failure to make a refund allegedly due a complainant. Further action is to be taken pending outcome of notification of this board motion.

August J. DiBiase, R-104287, Rochester, N.Y., was expelled for charging his ANA membership fee to an invalid

charge card.

William Harper, R-35836, dba Buffalo Bill Harper, Sherman Oaks, Calif., was suspended from membership for failure to answer ANA official correspondence regarding coins he sold and that were returned but for which he allegedly made no refunds. Further action is to be taken pending outcome of notification of this board motion.

Lloyd R. Jennings, R-104164, Washington, D.C., was expelled for failure to make good on a bad check.

Robert Nunnery, R-95198, Gainesville, Fla., was expelled for failure to answer ANA official correspondence regarding coins he sold but allegedly did not deliver and coins he bought but for which he allegedly did not pay.

Aliette Puhlick, R-101502, dba Mercury Coin & Stamp, Miami, Fla., was expelled for failure to answer ANA official correspondence regarding alleged receipt of coins for offers to buy but not returned or paid for. Also it is alleged that her firm took payment for coins bid on in its auction but never received by the payer.

Richard W. Suter, R-79267, dba National Investment Publishing Co., Chicago, Ill., was expelled for failure to answer ANA official correspondence regarding coins allegedly sold but not delivered to the buyer.

Other complaints and requests for reinstatement were considered but no final action taken at this meeting, some of them requiring further investigation.

Future Conventions

The auction sale privilege at the 1982 midyear convention in Colorado Springs was awarded to Kurt R. Krueger on the basis of the terms of his bid as compared to those of several other dealers. The guaranteed donation to ANA is

ASSOCIATION NEWS

\$10,500, with a greater donation if the amount of the sale reaches certain fixed totals. In addition, the sale is to include 200 lots of ANA material and 100 lots of YN material at no charge. The Krueger portion of the sale is to include a minimum of 1,000 lots and a maximum of 2,000 lots. This action was approved by a 6 to 1 vote (Governor Boosel), with Governor Krueger temporarily absent from the meeting.

The bourse table fee for the 1982 convention in Boston was set at \$750. Space in two rooms will be utilized and a lottery system is to be used to position the bourse dealers.

The executive vice president was authorized to arrange for the site and date of the 1983 midyear convention in San Antonio or Corpus Christi or an alternate location (if neither of these can be arranged) in the southwest.

Members of the official family attending a convention and suspecting unauthorized persons behind a bourse table are directed to notify the convention coordinator in writing as soon as possible. If knowledge of such an infraction is certain, the sergeant-at-arms should be notified also.

Approval was given to establish special convention checking accounts in the following convention cities: New Orleans, Boston, San Diego, Detroit and Baltimore.

The policy was established that officially authorized personnel traveling to future conventions be allowed coach class airline fares from their homes of record to the convention city and return to their homes. Governor Criswell opposed this motion.

Headquarters Building

Approval was given to the executive vice president to rent office space outside headquarters to alleviate the crowded space in the building during the interim before our building expansion project is completed.

The board accepted the building ex-

pansion plans presented by the executive vice president, including changes suggested by Vice President Wilde.

The executive vice president was authorized to establish a date for a symbolic ground breaking ceremony for the headquarters building addition and to publicize such date. Subsequently May 7 was chosen as the date.

A resolution of intent was adopted that the amount of net gain in our operating budgets, less the amount budgeted for contingency, for the fiscal years 1980-81 and 1981-82 be transferred to the building fund.

The executive vice president was authorized to cooperate with Steve Ivy Numismatic Auctions in scheduling an auction which that firm offered to hold for the benefit of the ANA building fund.

Certification and Grading

The board authorized the ANA Certification Service to start grading United States commemorative coins, based on the following approved grading system devised by John Smies and Kenneth Bressett.

MS-60 (Typical)

A mint state coin with little or no luster, or fully lustrous with numerous contact marks, or chemically cleaned.

MS-63 (Select)

A coin with half or more of its original luster plus some detracting bag marks.

MS-65 (Choice)

A coin possessing full mint luster with no major detracting features such as heavy slide marks on the high points of the devices, no deep contact marks, and no visible or excessive hairlines from cleaning.

MS-67 (Gem)

Virtually flawless; but must allow for very minor imperfections.

MS-70 (Perfect)

A flawless coin exactly as it was minted, with no trace of wear or injury. Must have full mint luster and brilliance or light toning. Any unusual striking traits must be described.

The recommended additions to the *Official ANA Grading Standards* for

ASSOCIATION NEWS

United States Coins as presented to the board were approved, as follows:

MS-63 (Unc. Select)

A mint state coin with attractive mint luster, but with some detracting contact marks or minor blemishes.

MS-67 (Unc. Gem)

Virtually flawless, but must allow for very minor imperfections.

Albert H. Wohlers, the ANA insurance administrator, appeared before the board and explained a tentative plan for insurance covering our certification and grading (ANACS) operation. After considerable discussion the board authorized the executive vice president, if he deems it feasible upon further development of the plan, to sign a contract for such insurance, predicated upon a) the fee to be charged for such insurance is not to exceed \$3.00 over the present minimum ANACS fee, and b) that the contract meet with the approval of our legal counsel.

Finances

Approval was given to increase the ANA imprest account to \$2,000 and the ANACS imprest account to \$5,000.

Authorization was given for up to \$3,600 toward the cost of presenting the African Emblems of Wealth Exhibit in the headquarters museum area to be charged to the exhibit account.

The executive vice president was authorized to make unit equipment purchases up to an amount of \$5,000; the purchase of any unit costing more than \$5,000 must be approved by the board.

The board requested the executive vice president to prepare a plan for making annual Christmas bonuses to ANA employees, to be reviewed on an annual basis, and present it to the board at the August 1981 meeting.

The board adopted, with minor changes, the revised 1980-81 budget and the proposed 1981-82 budget. These budgets cover all phases of ANA operation, including ANACS and conven-

tions, as agreed upon at the August 1980 meeting. Income and expenses are balanced in both budgets; the 1980-81 amounting to \$2,242,856 and the 1981-82 to \$2,506,450.

Miscellaneous

The board directed that advertising published in *The Numismatist* conform to official ANA grading standards. We are to request other numismatic publications to support these standards by rejecting advertisements wherein the advertiser states that he conforms to the ANA grading standards when in fact his advertisement does not do so.

Governor Criswell was requested to indicate to Arkansas Surplus Lines, Inc., that the board does not want to become involved in any dealer insurance programs and that it does not permit use of the ANA seal by others, but that it has no objection to the individual ANA dealer members being solicited.

The executive vice president was asked to inform member Les Fox that the board does not want the ANA to participate in the proposed legal referral service.

The board directed headquarters to send a copy of *The Numismatist* to those members of the Congress designated by the ANA legislative counsel and approved by the executive vice president for one year.

Action regarding the YN scholarship program was left to the discretion of the YN committee chairman with the coordination of headquarters, and the guidelines presented to the board regarding the handling of complaints were approved.

The board recommended that the complete auditors' report be made available to any member that would like to see it, and that a copy be given to the auditing committee. This motion was opposed by Governors Karlson and O'Donnell, and was passed during a temporary absence of Governor Schook from the meeting.

SEMINARS

Summer Seminar Classes Filling Fast

Due to increased enrollment and growing interest in the ANA's summer seminar over the past several years, the association is holding seminars this summer in two locations. The first seminar will be the week of June 28-July 4 at the American Philatelic Society headquarters at Pennsylvania State University, State College, Pa. The following week, July 5-11, ANA headquarters and Colorado College in Colorado Springs will host numismatists from across the country for the 13th annual summer seminar held at that location.

Classes to be conducted at Penn State University, Monday, June 29 through Friday, July 3 (June 28 and July 4 are arrival and departure dates) are *Detection of Counterfeit and Altered Coins*, *Coin Grading*, *All About Coins*, *Charles Wolfe Course on Ancient Coins*, and *All About Paper Money*. At Colorado Springs the following classes are scheduled from Monday, July 6 through Friday, July 10 (July 5 and 11 are arrival and departure dates): *Detection of Counterfeit and Altered Coins* (Beginning and Advanced), *Coin Grading*,

All About Coins, *Coin Photography*, and *Numismatic Writing and Research*. A new offering this year is the course at State College, *All About Paper Money*, which will be taught by Dr. John A. Muscalus of the Historical Paper Money Research Institute in Bridgeport, Pennsylvania.

Tuition for a course at either location is \$250 for ANA members and \$275 for nonmembers, and in each case includes lodging, meals and a field trip. Costs of lodging and meals for a spouse or child not attending classes (children under age 11 may not stay in a Colorado College dormitory) is \$25 less.

At each location a Sunday evening "get acquainted" session will be held, including light refreshments and some form of brief program. Following the weeks' classes, certificates of completion will be awarded to students on Saturday morning before they depart for their homes.

Each applicant for a class at either location must submit an application on a form that is available from ANA Headquarters, P.O. Box 2366, Colorado Springs, CO 80901.

ANA CERTIFICATION SERVICE

Die Characteristics of Some Counterfeit 1955 Doubled Die Cents

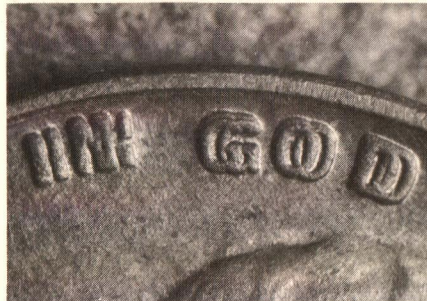

ANACS receives a great number of 1955 Doubled Die cents every month. While most of those received are genuine, the counterfeits seem to give many collectors a great deal of trouble because die characteristics are often memorized for only one or two of the known variations. This month we show you diagnostics of five different counterfeit die pairs as well as the most important diagnostic of the genuine 1955 Doubled Die cents.

Obverse 1, Reverse 1

COUNTERFEIT OBERSE 1, REVERSE 1: There is a tiny spike of metal sticking upward from the left end of the top of the first 5 and some odd looking tooling marks on the lower back of Lincoln's shoulder.

COUNTERFEIT OBERSE 2, REVERSE 2: This die pair has a pimple on the field below the B of LIBERTY and a broken right vertical bar of the N of IN.

Obverse 2, Reverse 2

COUNTERFEIT OBERSE 3, REVERSE 3: There is a depression in the very end of the right wheat stalk and some rather heavy die polishing behind Lincoln's shoulder and neck.

COUNTERFEIT OBERSE 4, REVERSE 4: There are odd shaped lumps on the obverse, one between GOD and WE and the other on the field behind Lincoln's head above the Y of LIBERTY.

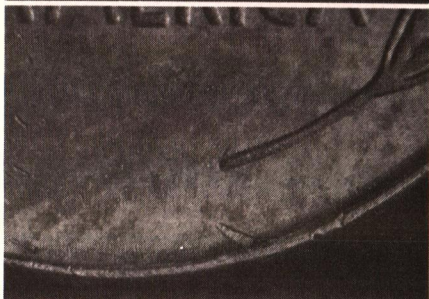

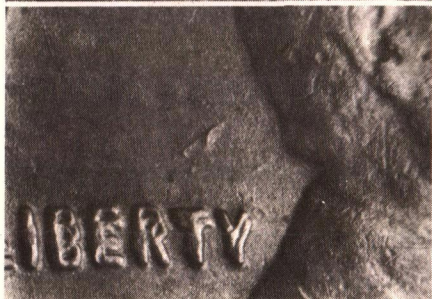

COUNTERFEIT OBERSE 5, REVERSE 5: There is an area of tooling marks on the bottom of the lapel on the obverse and a spike of metal inward from the rim below the end of the right wheat stalk.

GENUINE: There are two very fine die polish marks that extend downward, parallel to the right side of the T of CENT, from the crossbar. They appear to converge about one-third of the way down the T, forming a tall X. When

looking for these fine marks, you must be certain that the light is directed from either the right or left at 90 degrees to the stem of the T, so that the light creates the highlights and shadows necessary to spot the lines. It may be next to impossible to see the die polish lines with anything less than a good 10 power glass so, if you are among those still using the 2x or 3x single lens glasses, you should seriously consider purchasing a 10 or 16 power doublet or triplet lens so that some of these finer details aren't overlooked when examining coins. Of course, the ideal tool

Genuine

for checking coins is a good stereo microscope.

New Fee Policy

When you send a coin to the ANA Certification Service for authentication/grading, you pay the postage and insurance, remit a fee for the service you request, and remit the return mailing charge. You get your coin back and hope for a photo certification that will state it is genuine.

But maybe, instead of the certificate, you are one of less than half-a-percent who get a statement to the effect that no decision can be reached, or that your coin cannot be graded. In the past year your fee would be refunded but not the return mailing charge. Effective immediately even the mailing charge will be refunded so that the only cost to you is what you paid to send the coin to ANACS.

Another possibility, much greater

than the "no decision" class, is the "not a genuine, original coin," or "has been altered" reply. In this case you've been given a conclusive report on your coin even though far from what you wanted. In the past, if you'd submitted a fee of more than \$100 for the service, ANACS would have charged \$100 and refunded the overage. Hereafter the ceiling fee for such cases has been lowered to \$50, but the paid return postage will be used by ANACS for returning your coin.

If the piece you sent for certification proves to be a replica, usually of little or no value, only the base fee will be charged regardless of the valuation you put on it. If you wanted grading but it can't be graded ("whizzed" coins are not graded, for example) the grading fee you paid will be refunded.

COLLECTORS GUIDE TO PRESIDENTIAL INAUGURAL MEDALS AND MEMORABILIA, by H. Joseph Levine. 1981. 120p. Illus. Paper cover. Johnson & Jensen, P.O. Box 1085, Danbury, CT 06810. \$8.95.

Interest in Presidential Inaugural Medals increases every four years with the inauguration of the President. In response to this interest the firm of Johnson & Jensen has published a collectors' guide by H. Joseph Levine, a dealer who specializes in presidential memorabilia. The book contains extensive background information based on his personal experiences. All official inaugural medals and badges since 1889 are included as well as some peripheral items such as committee badges, police badges and license plates. Each item is pictured together with the MacNeil and/or Dusterberg number, metal, size in millimeters, mintage and price ranges for extra-fine and uncirculated pieces. Included also are chapters on displaying collections, biographical notes of sculptors, and a pictorial essay on the creation of the Reagan medal.

HISTORY OF THE MONIES, MEDALS AND TOKENS OF MONACO, 1640-1977, by Raymond de Vos. 1977. 344 unnumbered pages. Illus. Hard cover. Testa Press, 12 quai Antoine, Principality of Monaco. \$50 (post-paid).

Until now, the only book in the ANA library devoted exclusively to the coinage of Monaco was published in 1885. A second volume on the subject, published in 1977, recently came to our attention. In addition to covering coins issued from 1640 to 1977, the book contains small sections on medals, tokens including some gambling tokens, and a chapter, including color illustrations, on paper money and military orders.

Each coin, medal and token is illustrated by a photographic enlargement and a line drawing of the actual size. Metal, diameter and weight are given for each piece, and descriptions of obverse and reverse. Background notes for each ruler relative to the coinage he issued are concise and informative. This beautifully bound volume brings up to date an interesting area of numismatics.

BUILDING FUND REPORT

More Club Contributions Received

We continue this month to spotlight coin clubs, adding the following clubs to the growing list of those that have contributed \$200 or more to the building addition fund by March 31, 1981.

The Orange County Coin Club, Santa Ana, Calif., recently held a benefit coin show and designated the \$840.50 proceeds to the building fund. Two other clubs recognized this month are the San Jose (Calif.) Coin Club and the Utah Numismatic Society, Salt Lake City, for contributing \$500 and \$200, respectively. The Numismatic Literary Guild gave \$500 to help swell the fund.

In memory of Val Pasvolsky two clubs added \$447 to the fund—\$225 from the Ocean County Coin Club, Toms River, N.J., and \$222 from the Cherry Hill (N.J.) Stamp and Coin Club.

Ninety-two clubs have donated to the building fund since January 1, 1980, but many others have not yet done so. The Building Fund Committee trusts that contributions will be received from other ANA clubs in the near future.

In the event that a club would like to give a program showing the "Then and Now of ANA Headquarters," a slide presentation is available and will be forwarded upon request. When making such a request, please give the date of showing and a member's name and street address to which the slides can be sent via United Parcel Service. Requests for this set should be made to the ANA Librarian at headquarters.

OBITUARIES

Joseph S. Arner ANA 10209

Following a short illness, Joseph S. Arner died December 13, 1980, in the Coaldale State General Hospital, Lansford, Pennsylvania. He had lived his entire life of 77 years in Eastern Pennsylvania.

Active in sports as a youth, Arner was a center on the 1922 Eastern Pennsylvania championship basketball team. His father died shortly after Joseph graduated and he took over the family hardware store in Summit Hill. He was active in local affairs, particularly in the local fire department, and served two terms on the town council.

Following a long time interest in numismatics, Joseph became an ANA member in 1944 and opened a coin and hobby shop two years later. He was a founder and charter member of the Panther Valley Coin Club (1948) and served in various club offices, including the presidency during its 25th anniversary year. He had moved his shop to nearby Landsford in 1952 because his wife operated a pharmacy there.

Joseph was a hobbyist first and a storekeeper second, with the result that his shop was a gathering place for his customers and friends. He was always most helpful to new coin and stamp

collectors and will be missed sorely by many in the area.

Survivors include his widow, a son and two brothers.—R/L

Walter P. Bohler LM 100

Association member number 3919, Walter Bohler, died March 19 at Poudre Valley Hospital in Fort Collins, Colorado, following a lengthy illness. He was 76 years of age and would have become a Golden Member of ANA on June 1 this year.

Walter was born in Lennox, South Dakota, and graduated from Beldon, Nebraska, High School in 1922 and from Drake University of Pharmacy in Des Moines in 1929. Two years later he married L. Hellena Price of Ames, Iowa. He established the first pharmacy in Poudre Valley Hospital 29 years ago and retired in 1976.

Organizer of the Fort Collins Coin Club in 1955, Walter served as its first president and was the only treasurer it ever had, still serving at the time of his death. He was president of the Colorado-Wyoming Numismatic Association in 1964, his wife having served as its secretary-treasurer during the past 13 years. Together they were instrumental in organizing coin clubs in

Ames, Cedar Rapids, Fort Dodge, Greeley and Sioux City.

Walter was a member of the Masonic Lodge in Des Moines and Fort Collins, the Order of the Eastern Star of Fort Collins and the Galilee White Shrine of Jerusalem. Survivors, in addition to his widow, include a brother, two daughters and five grandchildren.

A memorial fund has been set up in the name of Walter P. Bohler LM 100, to which contributions may be sent in care of ANA headquarters. The proceeds will be used for the library in the headquarters building addition. Checks should be made payable to ANA, with the notation "Bohler Memorial Fund" on the blank part of the check.

Association bylaws require publication of each application but not necessarily the applicant's mailing address. However, if the option to omit the street or box number was not exercised on the application form, it has been published herein. Such applicants should realize that numerous mailings will follow from various dealers and other numismatic organizations that scan the monthly publication of applicants.

The Association cannot prevent such use of your address now and in the future. However, the ANA has not and will not release any applicants' or members' addresses at any time or for any purpose beyond this initial publication. Notices of changes of addresses of members are never published or released from headquarters.

BBASIL

No, the typesetter did not misspell our heading. However, the diecutter for Brazil's 1922 500 reis commemorative coin did misspell his country's name! Fortunately, for coin collectors the world over, some of the coins left the mint before the blunder was discovered.

The BBASIL coin ranks among some of the best known errors in numismatics. It is one coin that you will not find pictured in Brazil's spelling primers.

Four grades are available:

UNC \$37.50 GEM UNC \$45.00
EF-AU \$25.00 VF \$14.00

Since the price of this famous "RAILROAD" has skyrocketed in value,

Y-46

NOW would be an opportune time to get aboard this little CHOO-CHOO from Brazil. It is ready to go places! The Brazilian locomotive made its debut in 1936, 14 years before Mexico issued their big "railroad". To the best of our knowledge, the Brazil Y-46 was the first coin to feature a locomotive.

The 200 reis, Y-46, was issued in 1936, 1937 and 1938. The date does not affect price. You can select from the following grades:

CHOICE BU \$24.00 EF-AU \$14.00 VF \$8.00

BRAZIL 1935

500 REIS

This Feijo 4 gram coin was minted for one year, with 14,000 issued. This number is considerably lower than any coin in the famous DISCOVERY SET of 1900.

Y-49

On a comparative basis of price and scarcity, the FEIJO coin is grossly underpriced. It is destined to rank as a key rarity in Brazil's Republic coinage.

We have acquired a small hoard of Feijo coins. They have lain dormant for over 50 years and are just super. Almost full mint lustre showing through a light golden toning. Two grades are available.

BU \$75.00 GEM BU \$90.00

All coins will be sent FIRST CLASS and insured. 30 days return privilege.

Globe Company maintains an extensive stock of Brazilian coinage. A current list is available on request.

**When you decide
to sell, you want
the highest
possible price
for your collection.
So does
Bowers & Ruddy
Galleries.**

We know how much time and money you have given to your collection, and we treat your property as though it were ours! We are working together to obtain the same result — high prices — since our commission is a percentage of the price which each lot brings.

Years of numismatic expertise go into the cataloguing of your coins. Unmatched photographic illustrations (color and black and white) of important pieces are placed right with the lots. We give you and your coins treatment of an uncompromising nature — to entice bidders to bid liberally.

Don't sell valuable rarities or choice type coins outright. Don't trust the big job of offering them to the collecting public to a little auction firm. If you do either, you will probably not get nearly what you should for your coins. Instead, consider for a moment the valuable qualities which are yours through a Bowers and Ruddy Galleries rare coin auction — qualities which can be yours for just a low commission rate.

Bowers & Ruddy Galleries, Inc.

IMMEDIATE CASH ADVANCES are available in any amount. There is no need to sell your property outright at less than you should receive, because we will gladly give you an instant cash advance the moment your consignment is accepted for auction.

COMPLETE PROTECTION FOR YOUR HOLDINGS. Your property is fully insured and protected in our bank vaults from the moment we receive it—and we will even send couriers to pick up your coins if your collection warrants it. A secure financial settlement following the sale is also guaranteed, for no auction service anywhere is more reliable than Bowers and Ruddy Galleries, a member of the billion-dollar-strong General Mills family of companies. Peace of mind is yours!

PROFESSIONAL REFERENCES. Our founders, James F. Ruddy (retired) and Q. David Bowers, are life members of the American Numismatic Association and are members of the Professional Numismatists Guild (Mr. Ruddy is a recipient of the PNG's Distinguished Service Award, and Mr. Bowers is a director of the PNG), the International Association of Professional Numismatists, the American Numismatic Society, the Royal Numismatic Society of London, and other leading organizations worldwide. Both are widely known for their research and writings in the field of numismatics, including best-selling books on coin grading and investing.

THE BEST POSSIBLE PRICES for your rarities and choice type coins are the result of our famous numismatic expertise, our research into varieties, our superbly illustrated auction catalogues, and our extensive advertising for each auction. THERE IS NO FINER AUCTION SERVICE!

Join the group of satisfied Bowers & Ruddy Galleries consignors next time you decide to sell your collection or significant single rarities (minimum consignment \$2000). You owe it to yourself to consider the sale of your coins carefully — so, fill out the coupon below and we'll send you our informative brochure, "How to Sell Your Coins for the Best Price," or call our auction department or Q. David Bowers on our toll free auction action number, (800) 421-4224. They'll give you complete details about including your collection in one of our upcoming auction sales.

All coins in the set bear the date 1981 - the first year of issue. Of special interest are the designs which show various marine animals on the obverse and Iceland's land-wights or guardian spirits on the reverse.

This special issue is limited to 15,000 sets, specially produced by the Royal Mint in London, where Icelandic coins have been struck for over 40 years.

The proof coins are available in sets only. Each set is sealed in a transparent plastic case with attractive outer wrapper and information card in English and Icelandic.

ARGENTEUS

Two masterpieces in pure silver.

CAROLUS IV

Roman Emperor and King of Bohemia (1316-1378) who gave his realm a constitution and authenticated it with a golden seal. The ARGENTEUS, struck in 1978, was modelled on this famous seal.

THE KNIGHT,

who feared neither the devil nor death, was taken from a 1513 drawing by Albrecht Duerer and struck in 1981.

The reverse design is the same for both pieces: PRO PROSPERATE MUNDI (For the prosperity of the World), ARGENTEUS (The Silver One), III (Triple, weight 45 grammes). The ARGENTEUS has been introduced as a step toward the establishment of an international currency of lasting value based on precious metals. All previous issues have been discontinued. Important: Not more than 10,000 of either type have been struck in silver. The illustrations are slightly larger than the actual size which has a diameter of 50mm.

Pure silver, brilliant proof! Price per piece only

\$48.00 each

Mailing will be at our expense as Registered Air Mail. Send your order and check (Payable in advance) to:

In the tradition of the very best...

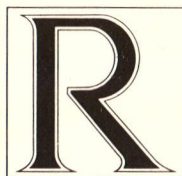

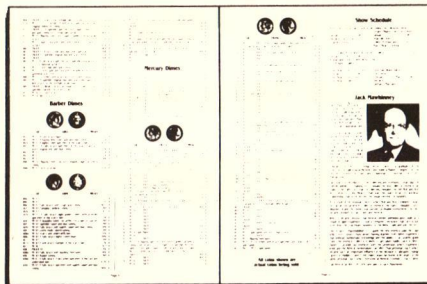

Every profession or field has its superstars; the "Big Eight" accounting firms, the top ten ad agencies, the oil industry's "Seven Sisters". The numismatic field, likewise, has its superstars...the big, well-established, ethical dealers who provide the best in honest, intelligent counselling to coin collectors and investors and who buy and sell millions of dollars worth of guaranteed-quality rare coins each year. You know who they are; *Renrob* is one of them.

There the similarity between Renrob and the other leading dealers ends. Renrob offers one thing more. *The personal touch.* Despite our size and volume, the principals of Renrob remain accessible and even the smallest investor/collector receives the same courtesies as any of our major customers.

Serious Collectors and Investors

are invited to learn more about Renrob Coins and its services. Simply complete and mail the coupon below to receive a free sample of our illustrated *Rare Coins and Currency Price List*.

"We Select the Select"

How to bid by mail

1

Step One: select the coins that interest you from our auction catalog.

2

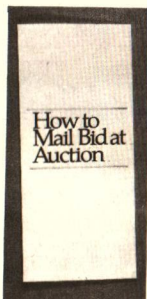

Step Two: decide the top bid you're willing to pay for each coin. There's always a chance you may purchase a coin for less than your maximum bid. Our exclusive CompuBid™ system allows you to bid on as many coins as you want and still limit your total bid. We show you how we do it automatically for you in our descriptive brochure.

3

Step Three: send in the coupon below, or call us for answers. We will send you a free brochure explaining the ins and outs of bidding. Or call us for estimates. We'll give you straight information and no sales pitch. Remember: we're not selling these coins for ourselves, but for our consignors.

4

Step Four: fill out your bid sheet and mail it early enough to reach us before the auction sale date. If you succeed in buying a coin, it will be sent to you the first Monday following the auction. We guarantee to put your coin in your hands fast.

Our free brochure, **How to Mail Bid at Auction**, answers all the basic questions about bidding by mail. Our staff of coin professionals developed the information source as a service to experienced and beginning coin buyers alike.

Get your coins at your price. In May.

If you've never bid at auction or have been looking for the right auction, read this.

Here's your chance, May 28-29, at our auction. We are offering some of the most beautiful and rare coins you have ever seen. Each year we present over 20,000 rare coins for sale at auction. Often we sell coins that haven't been seen on the market for years. With all those coins to choose from, chances are you will find the coins you've been looking for.

And because no reserved or minimum bids are accepted on these coins, you have the opportunity to buy them at the price you want to pay.

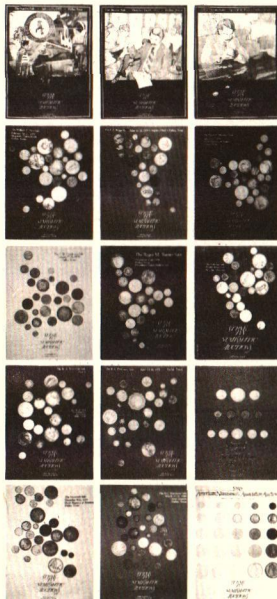

You get to see the coins before bidding.

The only way you can know about these rare coin opportunities in advance is through our auction catalogs. Each sale offers a beautiful, full-color, magazine-size catalog that fills you in on every coin to be sold.

You can subscribe to a full year of our catalogs for a single \$20 payment. Or you can receive a complete year's subscription to our auction catalogs free by sending us an invoice of at least \$500 for coins you purchased through another auction company or your current rare coin dealer.

Bidding by mail is easy and exciting.

You can bid in our May auction from where you are right now. To learn how easy it is to buy the coins you want at the price you want to pay, simply follow the four steps on "How to Bid by Mail" on the left side of this page.

During the past four years, over 100,000 sought after rare coins were purchased through Steve Ivy Numismatic Auctions, including the coins of the 1980 A.N.A. Auction. Selected as the auctioneer for the 1982 A.N.A.

1946 UNITED NATIONS MONETARY PATTERNS

ORIGINAL BRILLIANT PROOFLIKE SPECIMENS

These ESSAI DUCATONS were struck in 1946 as an International Monetary Unit. After striking only 313 GOLD and 1,000 each in SILVER and BRONZE, the dies were destroyed due to the objections of the Director of U.S. Mint.

The beautiful design of the flags of the Big Five Powers (France, England, United States, Soviet Union and China) combined with the symbolic "Four Freedoms" figures makes these an exciting and popular issue. These intriguing DUCATONS have been long sought-after by collectors of U.S., Foreign Gold and Silver Crowns.

WE BUY ANTIQUES AND SELL "JUNK"

We Buy Junk . . . and Sell Antiques!

So much for jokes. Our position is that we buy and sell collectible coins, sometimes offhandedly called "junk" because they are not expensive coins. Our reward comes in the fact that we sell collectible coins to individuals who enjoy them for what they really are; artistic mediums of trade, chronicles of history, and something to not only enjoy but to preserve. This versus the thrust of many who sell only highpriced items (i.e. choice, beautiful, magnificent, outstanding, bloomers, mintstate 70+, etc.) to investors who can only see coins as investment tools or profits. We have endeavored to supply the average person who can't or won't spend \$300+ per coin with fairly priced, correctly graded coins for his collecting enjoyment. As your collection grows we try to keep pace, and also aid the start of the next group of collectors. Our ultimate goal has always been to have our customers eventually become our friends and share with them the enjoyment of the numismatic hobby. Because we deal in the type of merchandise that retails comparatively low, some like to label us "junk" dealers; not because our merchandise is literally junk, but because each coin is not in excess of a few hundred dollars or some high-powered rarity.

We viewed the market from its start in the 1850's when dealers like Ed Cogan rode the first boom of the U.S. collectors market in the 1860's. Yet, it was almost a hundred years later (between 1940 and 1950) before availability and collector demand began to shape and dictate the current price guidelines and structure that basically remain the same today, with the exception of a higher pricing range. This was also the same time that commemorative coins flooded the market; a collector inspired issue which initially met with varied success and failure. The point being though, that the collector was beginning to become a force felt by the government, who again was issuing proof sets (1950) with greater production quotas than ever before to meet the newly established collecting demand. With the freeing of gold by our government in 1973-74, the start of the current phase and boom of the market began. Silver rose, riding the "gold fever" wave and itself proved to be more of a factor to the collector, whereas gold played more the culprit to the investor.

Viewing the market with a culmination of opinions and facts has led us to believe that silver has had more to do with collectors coins; and the fact that they are becoming more and more out of reach to the average collector. The common half dollar, once a 75¢ coin, now tops \$5 because of its "melt value." This is not to forget how often the seemingly capricious whims of the silver market have upset whole pricing indexes of silver related issues.

We concluded after studying the long and short avenues and the history of the current market that the present down trend in the collectors market has been incited by the constant harrassment of the sporadic silver market. Furthermore, to face the current situation, which is unprecedented in modern coin history, we have had to make adjustments and open new avenues of operation within our firm to serve the public.

We started this article kidding ourselves a little about the mail-order coin business that we've been proud of operating, and we intend to continue this service in a more structured fashion. However, we will be taking several new directions and would like to encourage you to participate by writing to us, or, if more urgent, giving us a call. These three listings are new areas we are immediately concentrating on:

1. **WE ARE BUYING VERY SERIOUSLY . . .** We have shifted our inventory substantially in the past few months and are definitely interested in restocking many areas and can make immediate payments on graded merchandise. Write, call or just bundle and ship for a firm offer and fast 24 hour payment. We'll travel, too!

2. **SOLICITING YOUR WANT LISTS . . .** This will be a completely new facet for us. Though we have done it in the past successfully, we moved away from it three years ago. Remember, we still maintain a huge inventory of U.S. coins and we travel constantly, maintaining your want list and keeping in touch. Don't forget about our layaway plan.

3. **WE WANT YOU!** We will still be handling mail order, and cordially invite you who haven't already joined our mailing list to do so by sending us a post card with your name, address and zip code.

Thank you.

Do Business with the Leaders!

Do business with the leaders in the rare coin field! Do business with members of the Professional Numismatists Guild.

Rightly or wrongly, it's a fact of life that anyone can call himself a "rare coin dealer," even if he saw his first rare coin only yesterday. And, assuming that he has good banking references (not necessarily numismatic references), he can run large and impressive-appearing advertisements as well. How, then, do you as a prospective coin buyer or seller know whether you are doing business with a firm with extensive numismatic knowledge and financial strength or whether you are doing business with a newcomer with little experience but with a big advertising budget?

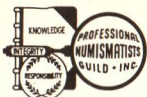

The answer is simple: DO BUSINESS WITH MEMBERS OF THE PROFESSIONAL NUMISMATISTS GUILD!

Each and every Professional Numismatists Guild member—and there are over 200 of them worldwide—has passed strict admission standards, including years of full-time professional experience and substantial net assets. Further, the dealer has subscribed to a rigorous code of ethics. When you do business with a PNG dealer there are no worries about grading. There are no worries about authenticity. There are no worries about financial stability or responsibility. There are no worries about misrepresentation. In short, you get the quality, value, and service you expect. Further, should any dispute ever arise between you and a PNG member, your notification of the problem to the Executive Secretary will result in immediate action being taken. And, should the dispute be a serious one, the PNG arbitration system is available to you without charge—a system which has been 100% satisfactory in the past to all who have participated and which, in fact, has been so successful that it has been adopted elsewhere.

NUMISMATICS IS A WONDERFUL HOBBY! Get to know your PNG dealer—a wonderful relationship awaits you.

A directory of PNG members is available free on request from the Executive Secretary.

**Think seriously
about
less—than—perfect
type coins**

LET'S LOOK AT THE 19th AND EARLY 20th CENTURY TYPE COINS

These have always been a favorite and are continuing to be more popular. Brilliant uncirculated type coins have shown outstanding growth in the past few years.

In our opinion high grade type coins are overdue for a substantial increase in price.

The reason we feel this way is due to the big spread between extremely fine, about uncirculated and brilliant uncirculated type coins.

HERE ARE A FEW EXAMPLES:

Trade Dollars in extremely fine \$95.00, nice sharp about uncirculated \$250.00, MS60 (uncirculated) \$800.00, MS65 brilliant uncirculated \$6,000.00 and in proof the price of a new cadillac.

Flying Eagle Cents Extremely fine \$60.00, about uncirculated \$175.00, uncirculated \$350.00, brilliant uncirculated \$1,400.00

Barber Dimes, Quarters and Halves can be bought in XF—AU for a fraction of BU prices. The same holds true for seated, liberty, bust coins, three cent pieces, two cent pieces, half dimes and others.

What I am getting at is that you can buy slightly less than perfect coins and still have a desirable selection of coins at a fraction of the price.

OK Norm, send me a selection of type coins, extremely fine or better. I understand I must be completely satisfied.

ON THE SELLING PRICE.

Seaby is a household name in the coin and medal business. Seaby's *Coin & Medal Bulletin* has a wider circulation than almost any other numismatic list or auction catalogue. Although our business is mainly buying and selling coins and medals outright, collectors and dealers may be interested in selling individual items or collections through Seaby on commission at 15%. - (2) Expert listing in the *Coin & Medal Bulletin* by one of our 18 specialist numismatists.
- (3) Full insurance coverage.

Clients are asked to consign items to us for a minimum of three months. Items over approx. \$600 will be illustrated free. A charge of approx. \$20 is incurred if an illustrated item remains unsold and is returned to the vendor.

We will give advice on the pricing of material. In the interest of our retail clients, we reserve the right to refuse items which we feel to be over-valued by the vendor or in any way unsuitable.

Listen to what has been said about this
complete compendium of United States
coin grading articles 1892 to date.

Mr. Jelinski,
"I nearly ignored wife, child, cat and job so
I could quickly absorb the feast waiting in
the book. It is a "must" for any collector,
inventor or dealer who wants to put the
entire grading situation in proper
perspective. Congratulations to you and
Dr. Bagg for providing the hobby with an
important reference work."

—Donn Pearlman - Skokie, IL

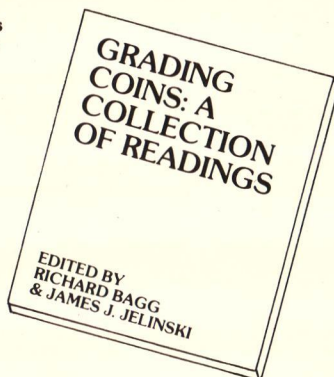

Messrs Jelinski & Bagg,
"I think you have brought together an
important wealth of information that shows
how important and timely articles over the
years have lead to our soon to be
forthcoming "ANA Grading Guide". I
would like to thank you for your
participation in its formative structure, etc."

—Grover C. Criswell, past-President -
American Numismatic Association

"It is a very worthy endeavor, especially
in this time of the wide discussions
concerning grading."
—Edward C. Rochette, Exec. Vice Pres.-
American Numismatic Association

"...find it to be interesting - informative
and helpful."

—Abe Kosoff - A. Kosoff, Inc.

"The book becomes practically a required
reading assignment for the collectors...Reading
this history of the grading problem and
becoming knowledgeable of past
suggestions will make both beginning and
long-time collectors increasingly aware
of the magnitude of the long-overdue effort."

Simply Simons.

When you finally get around to investing in rare coins, there is but one alternative: M.B. Simons and Associates, Ltd.

At M.B. SIMONS & ASSOCIATES, LTD., we have been in the main-stream of numismatic professionalism for over fifteen years, and our firm is steadily growing. We are one of the most firmly established rare coin corporations in the United States, and we aren't shy about flaunting our credentials; life members of the American Numismatic Association, members of the Professional Numismatists' Guild, the American Numismatic Society, and the Numismatic Literary Guild, as well as all major state, regional and educational organizations. From our headquarters outside Philadelphia we do business around the world and last year Krause Publications (producers of Numismatic News and other noteworthy publications) presented us their "Customer Service Award" for high business standards.

Although we do not claim to be the only noteworthy numismatic investment firm, we are recognized as one the best, and we believe our program is unique and worthy of your consideration.

In a word, we are flexible. Most major coin companies promote programs in which clients are required to subscribe to a regimen of fixed monthly payments. We do not offer such a plan because we feel it leads to certain abuses, and

clients wind up with coins they neither want nor enjoy. Our method is to work with you as an individual, in terms of your own investment goals and needs. Only then will we supply you with investment grade material to meet those needs.

Your investment is ultimately your own decision, and should reflect your own taste and intelligence as a result. We are here to advise you and to help locate the right coins for you at the right price. In so doing we have been instrumental in assembling some of the finest numismatic collections in the United States and abroad.

Our coin catalogues and fixed price lists are a guide for you, but your choices are by no means limited to the items we have in inventory. We are, after all, dealers in recognized rarities, and they are not as easily located as a block of common stock! We will gladly locate a particular piece for you if it is available, and we will be pleased to represent you at all major numismatic auctions.

We feel our research department is the best in the business. Our well trained, professional staff spends many hours each week researching price histories and current trends — constantly looking for the undervalued market areas that will provide you with the best possible investment material. In addition, we employ Certified Public Accountants who will gladly advise you on the numismatic investment of private funds, corporate pension plans, Keogh programs, or estate planning.

ASK FOR OUR CURRENT PRICE LIST

WHILE THE SELECT IS BEING SELECTED...

WE ARE BUSY LOOKING FOR THE GOOD BUYS.

SURE, WE LIKE THE THOUGHT of dealing in nothing but flawless MS 68 material. But, let's face it, not only is the supply of this type of quality extremely thin, but the price it brings can border on astronomical. Consequently, one can expect to look and look and pay and pay.

TEN YEARS AGO we would wholeheartedly agree that superb quality coins were, investment-wise, the best road to travel. Such quality was also in a price range where it could be collected instead of saved up for. This is 1981, however, and times have changed.

IT IS NOT OUR CONTENTION that gem material is now a bad investment or the wrong thing to collect. Nothing could be further from the truth. Buying the best your budget will allow is still sound advice. We would only like to point out that, among the other 99.99 per cent of the coin population, there are many fascinating, highly collectible and potentially profitable items out there, most at an affordable price.

NORTH DALLAS NUMISMATICS buys and sells quality coins. The term quality, of course, varies from series to series and, often, from date to date. But to believe that a coin has to be virtually perfect or even uncirculated to be considered quality is indeed a myth.

WE ARE EAGER BUYERS of original, medium to high grade, problem free United States coinage minted before the twentieth century. Just ship for our generous offer. If you are looking for accurately graded, consistent quality coins for your collection or portfolio, please write for our free monthly listing.

The following coins have been set aside exclusively for this advertisement:

Colonial 1788 Massachusetts Cent with period Fine 15	125

Your Money and Time Deserve Our Money and Time ... and a Lot More ...

After years of effort, dollars, and hours of study, you have managed to put together a collection of rare and quality coins of which you can be proud. Certainly, your collection is worth a lot more today than it was when you first began. So, why not spend a little more time considering the best method of sale.

**Superior Galleries can insure that
your coins will bring
the highest realized prices possible.**

CONSIDER THESE ADVANTAGES:

- * Superior entered the field of numismatics in 1930. Where else can you get 47 years of experience?
- * We are a financially sound corporation, prepared to provide generous cash advancements at the time of consignment.
- * Your collection, while stored in our vaults, is fully insured at all times.
- * With the use of our extensive Numismatic Library, containing over 2,000 volumes, your coins will be expertly catalogued by a staff of professionals who are more than just familiar with your type of collection.
- * We know the importance of quality photographs in assisting mail bidders, we therefore use more photographs than most European or Domestic auction firms.
- * Our auctions are strategically planned around major numismatic events to insure that our sessions are well attended.
- * Our mailing list has been carefully developed and closely screened to provide our consignment with qualified anxious buyers who are prepared to pay realistic prices for quality coins.
- * The promotion of our auction sale begins with the first consignment we receive. Our spacious location in Beverly Hills provides a most comfortable atmosphere and allows every floor bidder the opportunity to view the lots at least three months prior to our sale. We personally contact our active buyers and provide private viewing of your coins.
- * Most importantly, after the sale is over and you have reaped your financial rewards for all of the years you have spent building your collection, our catalog becomes your catalog ... A permanent record of all that you have achieved in numismatics.

We, at Superior Galleries, are certain that our method of auction sale is the finest available and we have proved it to our consignors. Now, we want to prove it to you. We will be happy to provide you with all of the information you will need as well as a past auction catalog and prices realized so you may judge for yourself.

MYLAR SOURCE

Stops Coin Oxidation! Stops Currency Fading!

Damaging coin oxidation and currency fading caused by "Ultra Violet Rays" from sunlight or fluorescent light is prevented by the use of Mylar. DuPont Mylar is the most dimensionally stable of all plastics. Mylar cannot be torn, contains no plasticizer as in acetate to migrate from film causing deterioration, brittleness, or yellowing. It is unaffected by water, moisture vapor, oils, greases, most acids, alkalis and solvents. At last—Coin and Currency Protection! We now have "failsafe DuPont Mylar, clear lined" coin Flip-Lines. Each comes with information card. No staples or cardboard. Coins are locked in by clear Mylar flap; coins do not touch vinyl.

#202E—Eze Flips—2" x 2", card inserts & Mylar lined V-Film, \$2.95/25 pcs.; \$4.25/50 pcs.; \$7.95/100 pcs. and labels.

#203V—2" x 2" V-Film envelopes with flap and Mylar lined. \$2.95/25 pcs.; \$4.25/50 pcs.; \$7.95/100 pcs.

DuPont Mylar liners only (#22L)

We now have Mylar liner inserts for your own holders. Use in 2" x 2" vinyl, Eze Flips, paper or other. Use for ultimate long term protection against harmful Ultra-Violet light. 100 pcs./\$4.95; 500/\$20.95; 1000/\$37.95. All with anti-fallout security flap, includes white labels.

100% Dupont Mylar Coin Envelopes

#122A - 2" x 2" envelopes with flap. Clear, strong, .003 mil. Mylar sealed at edges with Mylar strip, \$4.95/25 pcs.; \$9.50/50 pcs.; \$17.95/100 pcs. All with 3/8" x 1 1/4" labels. How much is it worth to have complete protection for valuable coins?

100% DuPont Mylar currency holders with labels

#213KT—large currency Mylar 7 3/4" x 3 3/4", \$4.95/25 pcs.; \$7.95/50 pcs.; \$13.95/100 pcs. and labels.

At *Edelman's*, you can obtain quick confidential loans for any amount up to 80% of the value of your properties — from \$50 to \$50,000 and more. Take as long as 30 months to pay with a repayment plan tailored to your specific needs. Your collection will be safely protected in *Edelman's* air-conditioned vaults until you reclaim it. Grover Criswell

Values currency the way collectors do. Carefully.

If you're like most serious collectors, you've got years, even decades of care invested. So when it comes time to liquidate your holdings, it's good to know there's a dealer who appreciates that kind of pride. Col. Grover Criswell is one of the nation's oldest and largest paper money firms. We've invested 35 years and two generations building a reputation of trust and responsibility to collectors. And because each member of the firm is deeply involved with numismatics, we promise the fairest, and most accurate evaluation possible.

OUTRIGHT CASH PURCHASE

With the aid of one of the largest libraries and modern knowledge, our professional staff is prepared to offer the most generous immediate cash settlement for your collection. You can ship your property to us for a free evaluation, or just send a description and we will contact you. We're prepared to travel anywhere for holdings of substantial value. And it's always been our policy to buy all that is offered, not just the "cream" of your collection.

PUBLIC AUCTION OR PRIVATE TREATY

Or, depending on which is more profitable for you, we can help you decide whether to consign your property for public auction or private sale. In this way, your holdings will be offered to thousands of interested collectors throughout the world. And all material is completely insured the moment it comes into our possession. So long as you are going to sell your pride and joy, at least get the dealer who values your collection the way you do. Criswell's takes the time to help you realize the most for your holdings. That's why collectors trust us.

Advise us if you have paper holdings for sale or if you wish to receive our auction catalogs. Our 104 page price list is available at only \$1.00.

Paying Top Prices

Not Just A Slogan But Guaranteed Results:

- 1) We are consistently one of the biggest buyers at any major coin convention we attend. The coins that we buy from other dealers have mostly been purchased from collectors. Why not sell to the top buyer?
- 2) Year after year we have bought more collections from collectors than other dealers on a competitive bid basis. We are not afraid to bid against our competitors; we welcome the opportunity.
- 3) We have one of the larger mail order businesses in the country and we are constantly in need of good numismatic material. Since we have the customers we can and will pay more.
- 4) We have never had to pass up a collection because of size. We will not try to buy your collection and then pay you for it as we sell it.
- 5) We spent over 100 days traveling last year to buy coins. Few can match this record. If you have a collection for sale, we would appreciate having an opportunity to show you how much we can pay.

You Have The Following Options Available:

- 1) You may ship your coins to us with the prices wanted.
- 2) You may ship your coins for our offer. We will contact you immediately with our offer.
- 3) Large collections we will travel to see.

COINS & CURRENCIES OF THE WORLD

Our first year in our new mall location has proven to be extremely successful. We are in need of choice numismatic material. Brisk inventory turnover has squelched our efforts to produce a fixed price list; however, we hope to be able to offer a list in the near future. Until such time, please feel free to send your want list for our quote.

Since 1958...

I've specialized in fine Foreign Commemorative medals (predominantly pre-1900) and think I can claim, perhaps immodestly but accurately, to be the leading specialist, at least in this country, in this type of material. There must be a reason why so many other dealers come to me for information, and as often as not sell their commemorative medals to me. The fact is, there are very few dealers who have the time, the patience, the historical interest, and the library necessary to do justice to this type of material.

When you have attractive or rare commemorative medals for sale, in any metal, I would appreciate the opportunity of purchasing them (of course I also buy worthwhile foreign coins, tokens, and essays as well, all at strictly competitive, up-to-date prices).
